HISTORICAL SUMMARY.

THE early history of the ROYAL COLLEGE OF SURGEONS OF ENGLAND is the history of two Companies, which, existing at first as separate fraternities or guilds, were for a time united into one body corporate, and finally became resolved again into two distinct Corporations. One of these, the Barbers' Company of London, is first definitely mentioned, in the records preserved at the Guildhall, in the year 1308, when Richard le Barber was presented and sworn before the Court of Aldermen as Master and Supervisor of the Barbers' Guild: and from an Ordinance of the City made in the previous year it is evident that the Barbers of London were at that time engaged in the practice of at least some branches of Surgery. The other Company, known as the Fellowship or Guild of Surgeons, is mentioned in the City records in the year 1369, when two Masters were sworn before the Court of Aldermen and given power to report the faults of unskilful Surgeons.

Origin of the College.

The Barbers Company first mentioned in 1308.

The Surgeons Guild mentioned in 1369.

Between these two bodies there was for many years a keen rivalry and jealousy. Each tried by turns to attain supremacy of authority and jurisdiction in matters relating to the practice of Surgery. In the year 1376 the Barbers made a complaint to the Mayor and Aldermen against unskilled practitioners in Surgery, and obtained an Ordinance providing that two Masters should be appointed annually to direct and rule the Craft, to inspect instruments, and to see that none should be admitted to the franchise of the City except after attestation of their skill by good examination. Fourteen years later, however, four Masters of the Surgeons' Guild were sworn before the Court of Aldermen, and they were invested with the power of scrutiny among persons practising Surgery and with authority to present defaults. But in the year 1410 the Barbers obtained from the Court of Aldermen confirmation of the privileges granted to them in 1376 with the addition that they should

be enjoyed "without the scrutiny of any person or persons of any other craft or trade under any name whatsoever other than the craft or trade of the said Barbers."

Barbers' Company assumes two-fold character.

The Barbers' Company was by this time assuming a twofold character, for it consisted of two classes of members, those who were Barbers simply or practised only the minor branches of Surgery, such as blood-letting and tooth-drawing, and those who exercised the faculty of Surgery. In the year 1415 the Mayor and Aldermen required the Company to furnish them with a list of all the latter class of members, from which they selected two as Masters of those practising Surgery, leaving to the Company itself the election of the Masters of the Barbers. Meanwhile the Guild of Surgeons sought an alliance with the Physicians. About the year 1423, probably through the influence of Thomas Morstede (a Surgeon who accompanied Henry V. to Agincourt and who was afterwards Surgeon to Henry VI.), they obtained an Ordinance from the Court of Aldermen having for its object an association or Commonalty of Physicians and Surgeons. Fortified by the support of the Physicians, the Surgeons once more challenged the surgical privileges of the Barbers, but these were again confirmed by the Mayor and Aldermen in 1424. The scheme for a combination of Physicians and Surgeons fell through, but the Surgeons continued a separate body with Ordinances for the government of their Society. The volume containing these Ordinances, which were made in the year 1435, is still in existence and is now in the possession of the Barbers' Company.

Provisions of the Charter of 1st Edward IV.

Freed from opposition, the Barbers' Company continued to grow in importance, and in the year 1462 the right of its members to practise Surgery was definitely established by LETTERS PATENT granted by EDWARD IV. in the first year of his reign. This Charter, from which the Royal College of Surgeons of England, as recited in the Charter of 1800, dates its constitutional history as a body corporate, was granted to the Freemen of the Mystery of Barbers of the City of London practising Surgery. They were made one Body and Perpetual Community with a Common Seal and with power to hold lands and make Bye-Laws. Provision was made for the annual election of two Masters to rule the Community, to have the scrutiny and government of all persons practising Surgery in London and its suburbs, as well as the supervision of their instruments

and medicines, and to have power to inflict punishment upon offenders by fines, imprisonment and other reasonable means. No person was to be allowed to practise Surgery within the City of London and its suburbs unless first approved by the Masters of the Company. The surgical rights of the Barbers' Company were thus firmly established, and, as testimony to the eminence attained by the Surgeons of the Company, it is worthy of note that the Senior Warden of the Company, when the Charter was granted, was WILLIAM HOBBS, Serjeant-Surgeon to the King—probably the first to hold that office.

In the year 1493 the Guild of Surgeons, which had continued as a separate body, entered into an alliance or "Composition" with the Barbers' Company, by which the two Companies agreed each to appoint two Wardens, the four so appointed to act together in all matters relating to Surgery and to the examination and government of its practitioners.

The Charter granted by Edward IV. to the Barbers' Company was confirmed by Henry VII. and also by Henry VIII., but in 1511 an Act (3 Henry VIII. cap. 11) was passed, constituting a further licensing authority by enacting that no person should practise as a Physician or Surgeon in London, or within seven miles of the same, unless first examined and approved by the Bishop of London, or the Dean of St. Paul's, with the assistance of four Physicians or Surgeons. Two years later, upon the petition of the Guild of Surgeons, another Act (5 Henry VIII. cap. 6) was passed, providing that a limited number of members of the Fellowship (or Guild) of Surgeons, as also of members of the Barbers' Company duly admitted as Surgeons, should be exempt from Constableness and Watch and from bearing arms and serving upon inquests and juries within the City of London.

IN THE YEAR 1540 the two Companies, which had so long been associated by voluntary agreement, were formally united by Act of Parliament, and thus entered upon a new era in their career. The Act (32nd HENRY VIII. cap. 42) after reciting that there were two distinct Companies of Surgeons in London, one called the Barbers of London and the other the Surgeons of London, enacted that the two Companies should from thenceforth be united and made one Body Corporate, to be called by the name of the Masters or Governors of the Mystery and Commonalty of the Barbers and Surgeons of London. The United Company was to enjoy all the rights

and privileges at any time granted to the two separate Companies. Four Masters or Governors, two to be Surgeons and two to be Barbers, were to be appointed annually; barbers were forbidden to perform any surgical operations, except the drawing of teeth, and surgeons were not to exercise the craft of barbering and shaving. Provision was also made for the study of Anatomy by giving the Company the right to claim four bodies annually of persons executed for felony. THOMAS VICARY, Serjeant-Surgeon to Henry VIII. and afterwards to Mary and to Elizabeth, was elected the first Master. The United Company shared the possession of Barbers' Hall, which is known to have occupied its present site in Monkwell Street since 1490 and was probably there even before that. The Hall, subsequently added to by Inigo Jones in 1636, is still standing, having escaped destruction in the Great Fire of London.

The Union thus effected was destined to last for more than two hundred years. At first, however, the privileges conferred on the Surgeons of the Company appear to have excited opposition, for in the 34th and 35th years of Henry VIII. an Act was passed allowing unlicensed persons to treat outward sores and swellings with herbs and ointments.

During the reign of QUEEN MARY, in the year 1555, Regulations were drawn up relating to the examination of persons for the Company's Licence to practise. These Regulations provided for the appointment of thirteen Examiners, including the Master and two Governors. This is the origin of the Court of Examiners of the Royal College of Surgeons of England, although it was not until the time of Charles I. that the appointment of ten Examiners—the number continued to this day—was provided for by Charter.

In the year 1605 the Company obtained a Charter from JAMES I. providing that the Governing Body of the Company should consist of four Masters or Governors, two of whom were to be Surgeons, and twenty-six Assistants. The Company was given power to examine Barbers and Surgeons, and to prohibit ignorant persons, or such as wilfully refused to be examined, from practising.

In the year 1629 CHARLES I. granted a further Charter to the Company, providing that ten Freemen of the Company should be elected and constituted Examiners of Surgeons in London. No one was to practise Surgery in London, or within seven miles of it, except Members of the College of Physicians, unless examined and approved by the Examiners of the Company, and every person so approved might practise Surgery anywhere

in England. Apprentices were to serve for not less than seven years, to be sound in body and limbs, and to read and understand Latin. The duty was also assigned to the Court of Examiners of examining Surgeons and Surgeons' Assistants for the Royal Navy and Merchant Service and of inspecting their instruments and chests of medicines. This duty they and their successors, the Company of Surgeons and the Royal College of Surgeons, continued to discharge until other arrangements were made at a comparatively recent date.

For many years the union between the two Companies appears to have worked smoothly, but as early as 1684 there were signs that the Surgeons were beginning to find their association with the Barbers irksome and inconvenient. In that year a Petition for the dissolution of the United Company was presented to the King, but the agitation died out, and it was not until many years later that further steps were taken in the matter. The dissatisfaction, however, continued. From the year 1540 the practice of Surgery had been entirely separated from that of barbery, and much progress had been made in surgical skill and knowledge. Under the United Company several of the Surgeons had attained great eminence in their profession, and among these may be mentioned Richard Ferris, Thomas Gale, the two Clowes', Wiseman, Amyand, Cheselden, Sir Caesar Hawkins, and Percivall Pott. The Surgeons resented the presence of Barbers at their examinations, and objected to the signatures of Barbers appearing upon Surgical Diplomas. In 1744 they informed the Barbers that they intended to petition Parliament for the dissolution of the union. The Barbers protested against this, and both parties presented Petitions to Parliament. The Surgeons prevailed, and in the year 1745 an Act of Parliament was passed dissolving the union and establishing two separate Companies. The Barbers were allowed to retain the whole of the Corporate property, real and personal, with the exception of the Arris Bequest and Gale's Annuity for Anatomy Lectures founded in 1646 and 1655 respectively. These Trusts the Act vested in the Company of Surgeons, and they are now administered by the Royal College of Surgeons.

appointed for life, of whom one was to be Master and two Governors or Wardens elected annually, and of whom ten were to be Examiners appointed for life. JOHN RANBY, Serjeant-Surgeon to George II. (whom he accompanied to the battle of Dettingen in 1743), became the first Master of the Company, and upon taking his seat he presented a handsome silver cup, which is still in the possession of the College. The First Wardens were JOSEPH SANDFORD and WILLIAM CHESELDEX. These appointments were made by the Act, which also specified by name the ten Examiners and sixteen Members of the Court of Assistants. The sixteen thus appointed were directed to meet forthwith, and select from the Freemen of the Company five others to complete the number of the Court. Thereafter, the Court were to meet on the first Thursday in July in each succeeding year for the election of the Master and Governors, and to fill up any vacancies, which from time to time might occur from death or resignation among the Examiners and Assistants. In addition to examining Surgeons for the Navy the Examiners were also required to examine all candidates for the posts of Surgeon or Surgeons' Mate in the Army. The Freemen of the Company were to enjoy the same Surgical privileges as approved Surgeons of the United Company had enjoyed under the Act of Union and Charter of Charles I., and, while in the practice of their profession, were to be exempt from all Parish, Ward, and Lect Offices and from serving upon Juries.

The Surgeons had to find a new home, and, after holding their first meetings at Stationers' Hall, eventually secured premises in the Old Bailey and there built Surgeons' Hall, entering into occupation in 1751. Here the business of the Company was transacted until 1796, when the Court of Assistants, finding the building in need of substantial repair and their tenure of the premises secured for not more than fifty-five years, determined to dispose of the property and erect a new building upon a freehold site.

About this time the Company became involved in difficulties in consequence of a provision in the Act of Incorporation which had unfortunately been framed without due regard to possible eventualities. This provision required that the Master and Governors, or any two of them, with nine or more members of the Court of Assistants, should constitute a Court for the despatch of business. On the 7th July, 1796, a meeting was held at which the Master, Mr. Gunning, presided, but at which no Governor was present, one having died in the previous May and the other being too ill

to attend. Consequently it was impossible to obtain a properly constituted quorum. Nevertheless the Court conducted its ordinary business, and among other matters elected Henry Cline to the Court of Assistants. In spite of this technical defect in their constitution, the Court of Assistants continued to transact the business of the Company. They disposed of their property in the Old Bailey and acquired a freehold site in Lincoln's Inn Fields, upon which part of the present building of the Royal College of Surgeons of England now stands. The business of the Company was not suspended. Examinations were held and Diplomas were issued. The Examinations of Surgeons for the Navy and Army were also continued. It became, however, necessary to find some means of removing the legal difficulties which had arisen, and, for this purpose and also with the object of acquiring additional powers and authority, a Bill was introduced into Parliament. The Bill passed through the Commons, but was thrown out in the House of Lords; and after further deliberation it was determined to abandon the Bill and to petition for a Charter from the Crown.

Meanwhile Parliament entrusted to the care of the Company the Hunterian Collection purchased for the Nation at a cost of £15,000. The Collection was delivered to the Company under an Order of the Treasury, dated 28th November, 1799, and in March 1800 the Company was re-incorporated and constituted by the name of the Royal College of Surgeons in London, by Charter granted by George III. In the year 1806 Parliament voted a sum of £15,000, and subsequently a further sum of £12,500, in aid of the erection of a building for the display of the Hunterian Collection. A contribution of £21,000 was at the same time made from the funds of the College, and the Museum was opened to visitors in 1813.

The Charter of the 40th GEORGE III. definitively severed the connexion of the College with the Corporation of the City of London. Members of the College were not entitled to any franchise belonging to the Freemen of the City, but all other privileges and possessions acquired under former Acts and Charters, and not altered by the Charter then granted, were continued and ratified. The Court of Assistants still consisted of twenty-one Members appointed for life with power to fill up vacancies as they might happen, and from them were chosen the ten Examiners, the Master and two Governors or Wardens being selected from these ten. The two principal Serjeant-Surgeons and the Surgeon-

CHARLES HAWKINS, Serjeant-Surgeon to George III., was appointed the First Master, and WILLIAM LONG and GEORGE CHANDLER became the first Governors. All Members of the old Company of Surgeons, on signifying their acceptance of the Charter, were entitled to become Members of the College, and any person in the future desiring to become a Member was required to pass an examination and obtain "Letters Testimonial of his Qualification to practise the Art and Science of Surgery under the Common Seal of the College." In addition to examining candidates for the Membership, the Court of Examiners were required, as under the former Acts and Charters, to examine all Army and Navy Surgeons, their Assistants and Mates, and to inspect their instruments.

A further Charter, granted by GEORGE IV. in 1822, changed the titles Master and Governors to President and Vice-Presidents, and provided that the Court of Assistants should in future be styled the Council of the College.

No change was, however, made in the constitution of the College until the year 1843, when a new Charter (7th VICTORIA) was obtained, which changed the name of the College to The Royal College of Surgeons of England, and instituted a new class of Members, who were to be called FELLOWS, from and by whom the Council were to be elected. The number of the Council was increased to twenty-four, and, while the existing Members of the Council were allowed to continue in office for life, provision was made that three elected Members should retire annually, so that, when no more life-Members were left, it would not be possible for a Member to retain his seat for a longer period, than eight years without re-election.

A great change was also effected by this Charter in the constitution of the Court of Examiners. They were no longer to be necessarily selected from the Council, but any Fellow, whether on the Council or not, was made eligible. The Examiners then in office were to continue for life, but all future Examiners were to hold office only during the pleasure of the Council. The Serjeant-Surgeons and Surgeon-General to the Forces were no longer to have any preference of being admitted Examiners, and the President and Vice-Presidents were not to be chosen

exclusively from the Examiners but from all the Members of the Council indifferently, whether Examiners of the College or not.

The Charter further provided that the President, Vice-Presidents and Members of the Council should be Fellows, and directed them to elect, within three months from the date of the Charter, not less than 250 and not more than 300 Members of the College to be Fellows. They were also given power to appoint other Members to be Fellows within one year from the date of the Charter. With these exceptions no persons were to be admitted to the Fellowship except by examination, nor until attaining the age of twenty-five years. The first Fellows, 300 in number, were chosen mainly from the Surgeons, Assistant-Surgeons and Lecturers of the Metropolitan and Provincial Hospitals. They were elected under one general Diploma on December 11th, 1843. A further election of 242 Fellows took place on the 26th August, 1844, and these included a considerable number of representatives of the Naval, Military and Indian Forces.

Provision for election of the first Fellows.

In the year 1852 further extension of the principle of election to the Fellowship without examination was made by a Supplemental Charter (15th VICTORIA), which enabled the Council to elect Members of fifteen years' standing to the Fellowship, provided they were Members when the Charter of 1843 was enacted. The Council were also empowered to admit annually to the Fellowship, without examination, two Members of the College of twenty years' standing, and authority was given for the *ad eundem* admission to the Fellowship, under certain conditions, of Fellows by examination of the Dublin and the Edinburgh Colleges of Surgeons, and the Faculty of Physicians and Surgeons of Glasgow. This Charter also provided that Members of the Court of Examiners thereafter elected should go out of office at the end of five years, but should be eligible for immediate re-election. Provision was also made for the appointment of a Board of Examiners in Midwifery for testing the fitness of persons to practise Midwifery, and Licences in Midwifery were granted to persons passing the Examinations of the Board until the year 1875, after which the Examinations were discontinued.

In the year 1859 the Licence in DENTAL SURGERY was instituted under the Charter of the 23rd VICTORIA, which empowered the Council to appoint a Board of Examiners for testing the fitness of persons to practise as Dentists.

Enabling Act of 1875.

In the year 1875 an Act of Parliament was passed to enable the College to associate itself with one or more of the Colleges or Bodies named in Medical Acts for the purpose of conducting joint examinations for qualifications to be registered under the Acts. In pursuance of the provisions of this Act the College subsequently entered into an Agreement with the Royal College of Physicians of London, establishing a CONJOINT EXAMINING BOARD and requiring that all candidates for the Licence of the Royal College of Physicians of London and the Membership of the Royal College of Surgeons of England, commencing professional study after the 1st October, 1884, should pass the Examinations of the Board before becoming entitled to their Diplomas. Thus was constituted the present Examining Board of the two Colleges. The lease of a site on the Victoria Embankment was acquired from the Duchy of Lancaster, and on this an Examination Hall for the Board was erected at the joint expense of the two Colleges. The foundation-stone was laid by QUEEN VICTORIA on the 24th March 1886, and the Hall was first used for examinations in the year 1887.

Charter of 1888 allows Fellows to record votes at Council Elections by papers sent through Post.

In the year 1888 a Supplemental Charter was obtained, mainly with the objects of enabling the College to hold lands and hereditaments of a greater yearly value than that previously sanctioned, and of allowing Fellows to record their votes at elections to the Council by voting-papers sent through the Post, instead of by personal attendance at the College, as required up to that time.

Honorary Fellowship instituted by Charter in 1899.

The last Charter, obtained by the College in 1899, the 63rd year of Queen Victoria's reign, enables the Council to elect persons, whom they shall deem to be sufficiently distinguished for the purpose, to be Honorary Fellows of the College. These Honorary Fellows, the number of whom must not exceed fifty at any time, are not eligible for the Council or for the Court of Examiners, nor are they entitled to vote at Elections to the Council. Their status is purely honorary and does not confer the right to practise Surgery. At the head of a list of distinguished names the College has the honour to place that of KING GEORGE V. His Majesty, when Prince of Wales, became an Honorary Fellow of the College, and, after ascending the Throne, signified his pleasure to retain the title.

New Examination Hall built.

In the year 1908 the Examination Hall on the Victoria Embankment was sold, and a freehold site in Queen Square, Bloomsbury, was subsequently purchased. Upon this site a new Examination Hall has been built by the two Colleges, and since May 1912 the Examinations of the Conjoint Board have been conducted in this building.

1. No person under the age of Twenty-one years shall become a Member of the College nor unless and until he shall have passed the Examinations for Qualifications to be registered under the Medical Act, held by the Examining Board for the time being constituted under the Scheme and Regulations approved and adopted by the Royal College of Physicians of London on March 12th, 1883, and by the College on April 29th, 1883 (herein called the Joint Examinations), and complied with the conditions relating thereto contained in the said Scheme and Regulations, or

such conditions as may be agreed upon between the College of Physicians and the College for the time being. Nothing contained in this Section shall diminish or affect the right of any person who shall have commenced professional study before the 1st of October, 1884, to be examined for and to receive the Diploma of Member of the College; but such right, where it exists, shall remain and continue, to all intents and purposes, as if this Bye-Law had not been enacted.

2. The Diploma of Member shall be in such Form as the Council may from time to time judge proper.

3. The Seal of the College shall be affixed to the Diploma of every Member of the College.

4. Every person, prior to his admission as a Member of the College, shall, in the presence of an Officer of the College, make and subscribe his name to the following Declaration:—

“I, A. B., do solemnly and sincerely declare, that, while a Member of the Royal College of Surgeons of England, I will observe the Bye-Laws thereof: that I will obey every lawful Summons issued by order of the Council of the said College, having no reasonable excuse to the contrary: and that I will demean myself honourably in the practice of my Profession; and to the utmost of my power maintain the dignity and welfare of the College.”

5. Every person, prior to his admission as a Member, shall subscribe his name to a Copy of the Bye-Laws of the College, in testimony of his having engaged himself to the observance thereof.

6. The fee for the Diploma of Member, exclusive of the fees payable for the Licence of the Royal College of Physicians of London under the Scheme and Regulations for the Joint Examinations, shall be such sum not exceeding Twenty Guineas and shall be payable in such manner and at such times as the Council from time to time direct, and in addition thereto there shall be paid the Stamp Duty, if any, on such Diploma and such reasonable fees for and in case of re-examination as shall be in like manner directed.

7. If the Court of Examiners shall find any circumstance in the Character, Conduct, or mode of Practice of any Candidate for Examination which in their opinion renders such Candidate unfit to be admitted a Member of the College, the said Court shall have the power of declining to examine him until the opinion of the Council shall have been taken thereon.

SECT. XV.—RIGHTS OF FELLOWS AND MEMBERS.

2. Should any Fellow or Member of the College be convicted of any Criminal Offence, or have his name removed from the Medical Register by the General Medical Council under Section XXIX. of the Medical Act of 1858, the Council of the College may, if they should consider the offence of which he shall have been so convicted, or for which his name shall have been so removed, to be of such a nature as to render him unfit to remain a Fellow and Member or a Member of the College, remove such Fellow or Member by resolution to that effect, from being a Fellow and Member or a Member of the College.

3. Any Fellow or Member who shall have been removed by Resolution of the Council as aforesaid shall thereby forfeit all his rights and privileges as a Fellow and Member or a Member of the College; and his Diplomas or Diploma shall thereupon be void and shall become the property of the College, and be delivered up by such Fellow or Member to the College on demand, provided that if at any subsequent time the Council of the College by Resolution, and subject to such conditions as they may think proper, rescind any Resolution which may have been passed under any of the preceding Bye-Laws for removing any person from being a Fellow and Member or Member of the College, such rescinding of the former Resolution shall have the effect of restoring such person to the Fellowship or Membership of the College, and such person shall, notwithstanding such removal or forfeiture as aforesaid, but subject to such conditions as the Council may in the particular case see fit to impose, be restored to his rights and privileges as a Fellow and Member or a Member of the College.

And every Fellow or Member of the College who shall thereupon be removed as aforesaid shall forfeit all his rights and privileges as a Fellow and Member or a Member thereof.

2. All meetings convened by or under the authority of the President or Council

of the College, as well for general business as for the delivery of Orations or Lectures, or for the distribution of Prizes, shall be under the control and direction of the President or other Member of the Council presiding at such Meeting. And any Fellow or Member of the College who shall interrupt, impede, or interfere with the proceedings at any such Meeting, or shall propose any matter for discussion or debate without the leave of the President or other person so presiding, shall, upon being required by the President or other person so presiding, immediately withdraw from such Meeting; and shall be moreover liable to be restrained and excluded by the Council from attending any Orations and Lectures at the Theatre, and from any use of or admission to the Library and Museum, and to be suspended from any or all other privileges which he may have as a Fellow and Member or a Member of the College, for any such period as the Council may adjudge. HUNTERIAN ORATION.

In the year 1813 Dr. Matthew Baillie and Sir Everard Home, Bart., Executors of John Hunter, "being desirous of showing a lasting mark of respect to the memory of the late Mr. John Hunter," gave to the College the sum of £1684 4s. 4d. Three per cent Consolidated Bank Annuities for the endowment of an annual Oration, to be called the Hunterian Oration, and to be delivered in the Theatre of the College on the 14th of February, the Birthday of John Hunter, by the Master, or one of the Governors for the time being, or such other Member of the Court of Assistants as should be appointed by the Master and Governors or any two of them—such Oration to be expressive of the merits in Comparative Anatomy, Physiology, and Surgery, not only of John Hunter, but also of all such persons, as should be from time to time deceased, whose labours have contributed to the improvement or extension of Surgical Science.

The Endowment was accepted by the College under a Deed of Trust dated the 9th October 1813, containing, amongst others, the following conditions:—That the Fund should be vested in the names of three Members of the Court of Assistants; that £10, part of the interest accruing from the Fund, should be given to the Orator; and that the remainder of the interest should be expended in providing a Dinner, on the day of the delivery of the Oration, for the Members of the Court of Assistants and such other persons as the Master and Governors for the time being should think proper to invite.

In 1853, after consultation with the representatives of the founders of the Trust, it was decided that the Oration should in future be delivered biennially instead of annually.

ARRIS AND GALE LECTURES.

The Arris Lectures were founded in 1646 by Mr. Edward Arris, a Member of the Company of Barbers and Surgeons, of which he became Master in 1651. He was also an Alderman of the City of London in that year. He died on the 28th May 1676. His portrait in one picture with a portrait of Sir Charles Scarborough, who was appointed to deliver the Arris Lectures in 1649, is in the possession of the Barbers' Company.

From the Minute Books of the Company of Barbers and Surgeons it appears that on the 24th March 1646 Mr. Edward Arris paid to the Company a sum of £300 "for the use of the new publique Anatomy." This sum was subsequently repaid to Mr. Arris, and in lieu thereof he settled upon the Company an annuity of £30, which shortly before his death he redeemed by the payment of £510. By the Act of Parliament of the 18th George II (1745) for dissolving the Union between the Barbers and Surgeons this sum of £510 was given and vested in the Company of Surgeons then incorporated, and upon the dissolution of that Company became vested in the College.

In the final settlement of the Trust no conditions appear to have been imposed save an understanding that the Anatomy Lectures of the Company were to be continued. By an Act of Parliament passed in 1540 the Company were entitled to claim four bodies annually of persons executed for felony, and to make use of them for the study of Anatomy. The bodies were dissected, and lectures on the muscles and other subjects were given. The Surgeons of the Company were required to attend these lectures and demonstrations, which were called "Public Anatomies." The intention of Mr. Arris was to assist the Company in this work, and the lecturers appointed under this foundation were at first called "Readers of the Muscular Lecture."

Under the Company of Surgeons the Arris Lectures were from 1753 to 1766 delivered by the Masters of Anatomy, of whom the first to be appointed were Percivall Pott and John Hunter. In 1767 the office of Professor of Anatomy was created, and the Arris Lectures were assigned to him.

The Gale Lectures were founded by Mr. John Gale of Bushey, a Member of the Company of Barbers and Surgeons, who, by his Will, dated 13th August 1655, left to the Company an Annuity of £16, payable out of the rents of certain premises on Snow Hill in the City of London, for one Anatomy Lecture in every year to be called Gale's Anatomy.

This Annuity, together with the Arris Bequest, was by the Act of Parliament of 1745 vested in the Company of Surgeons, and upon the dissolution of that Company became vested in the College. In pursuance of Acts of Parliament passed in the 35th and 44th years of George III for the improvement of Snow Hill, the Rent Charge of £16 per annum was purchased by the City of London for the sum of £432, which sum, in accordance with the directions of those Acts, was invested in the name of the Accountant General of the Court of Chancery, until the same shall again be invested in some Real Estate, and the same was laid out in the purchase of £689 16s. 5d. Consolidated Bank Annuities, the interest thereof being paid to the College.

The earliest record of a lecture under this Trust is dated 30th June 1698, when it was "ordered that there be an Anatomy Lecture called Gale's Anatomy," and Dr. Havers, well known for his description of the canals in bone, since called Haversian, was appointed the first Reader. The Lecture was afterwards called the Osteology Lecture.

Under the Company of Surgeons the Lecture was at first allotted to the senior Master of Anatomy, and afterwards to the Professor of Anatomy.

At the beginning of the Nineteenth Century, lectures were for a time suspended at the College owing to building operations, but were resumed in 1810. It was then determined that six lectures should be delivered annually under the Arris and Gale Trusts. The lectures were no longer distinguished as "muscular" and "osteological," but were united into one course delivered by a Professor of Anatomy and Surgery. In 1857 the title of the lecturer was altered to Professor of Human Anatomy and Surgery, and in 1868 to Arris and Gale Lecturer. In 1864 the number of lectures was reduced to three. Honorarium for the three lectures, the amount of the dividends received from the Arris Bequest and Gale Annuity—about £29.

ERASMUS WILSON LECTURES.

With the object of promoting the study of the Pathology together with the Anatomy and Physiology, human and comparative, of the Skin and its Appendages, the late Sir Erasmus Wilson gave to the College the sum of £5000 New Three per cent. Consols, under a Deed of Trust, dated the 8th July 1869, to found and endow a Professorship of Dermatology. The Council appointed Sir Erasmus Wilson to the Professorship, and during the period 1870-78 he delivered six lectures annually, and presented to the Museum a large collection of casts and models used in illustration of his lectures.

In 1879 certain alterations in the terms of the Trust were effected with the approval of the Founder, providing that the income derived from the Fund should be devoted to the promotion of original researches by lectures delivered at the College, the number of such lectures not to exceed three in any one year, and to be given by one or more persons to be called Erasmus Wilson Professors of Pathology.

In 1882 further alterations were thought desirable, and under a new Deed of Trust, dated the 13th April 1882, it is now provided that the income of the Fund shall be appropriated in part towards the payment of the salary of a Pathological Curator of the Museum, and in part for the payment of Lectures on the Pathological contents of the Museum to be delivered by the Pathological Curator or some other person appointed for the purpose with the title of Erasmus Wilson Lecturer. Three lectures were delivered annually from 1882 to 1908. In July 1908 it was decided to institute a series of Lectures or Demonstrations on advanced Surgical Pathology, illustrated by specimens in the Museum, and the Erasmus Wilson Lectures now form part of this Series. Six Demonstrations are given annually. Honorarium £30.

BRADSHAW LECTURE.

The Bradshaw Lecture was founded in memory of her husband by the late Mrs. Sally Hall Bradshaw, widow of Dr. William Wood Bradshaw, M.A.Oxon., D.C.L., LL.D., a Fellow of the College for many years in practice at Reading. Consols, the income thereof to be expended upon a lecture on Surgery to be called "The Bradshaw Lecture," and to be delivered annually on the 18th August, the anniversary of Dr. Bradshaw's death.

In 1882 an Order of Administration of the Bequest was obtained from the Charity Commissioners, which provided that the Lecture should be delivered on the 18th day of August, or on such other day as might be expressly substituted in each year for that day by the President. TRIENNIAL PRIZE AND JOHN HUNTER MEDAL.

This Prize was founded by the Court of Assistants in the year 1820, and was first offered for competition in 1822. The honorarium, which is provided from the funds of the College, at first amounted to Thirty Pounds, but in 1840 was increased to Fifty Guineas.

In 1864 a life-size statue of John Hunter by H. Weekes, R.A., was erected in the Museum of the College by public subscription, and with the residue of the

subscriptions the Statue Committee founded the John Hunter Medal, which in the year 1867 they entrusted to the College upon the following conditions, viz. :—
 “That the Medal be awarded to the Author of the Dissertation to which the Collegial Triennial Prize shall from time to time be adjudged on condition that the College, having entrusted to it the custody of the Medal dies for ever and to be used only for the aforesaid purpose, do promise and engage to have such Medal struck at its own proper cost.”

The Prize now consists of the John Hunter Medal executed in Gold to the value of Fifty Guineas, or, at the option of the successful Author of the Dissertation, of the said Medal executed in Bronze with an honorarium of Fifty Pounds.

Under a Deed of Trust, dated the 13th March 1830, he transferred to the College the sum of £300 three per Cent. CARTWRIGHT PRIZE AND MEDAL.

This Prize was founded in 1884 by the "Association of Surgeons practising Dental Surgery" with the object of commemorating the services of Samuel Cartwright, F.R.C.S., in improving the status of the Dental Profession, not only by inducing many of those engaged in its practice to become fully qualified Surgeons, but also by assisting to gain the recognition of Dentistry as a special branch of Surgery by the institution of a Licence in Dental Surgery by the Royal College of Surgeons of England.

The "Association of Surgeons practising Dental Surgery" having been dissolved, the administration of the Fund for the endowment of the Prize has been entrusted to this College under an order of the Charity Commissioners of the 31st July 1900, establishing a scheme approved by the Council of the College and the surviving members of the Association.

The Fund is invested in the name of "The Official Trustees of Charitable Funds," and the dividends are paid to the President and Vice-Presidents of the College as Trustees of the Fund.

The Prize, consisting of the Cartwright Medal in bronze and an honorarium of £70, is to be awarded quinquennially to the author of the best essay upon a subject relating to Dental Surgery to be selected by the Council upon the recommendation of a Committee. Candidates must be persons engaged in the study or practice of Dental Surgery and possessing qualifications capable of registration under the Medical Acts of the United Kingdom.

CONTINGENT BEQUESTS.

1827. Mr. Henry Cline bequeathed to the College, on trust, such an amount of his Three per cent. French Rentes as should at the time of his death produce £600 per annum, the dividends thereof to be received by his children, grandchildren, and great grandchildren, and after the death of the survivor of them, to be applied to the improvement of the Science of Surgery in such manner as the Council of the College should from time to time direct. In satisfaction of this Bequest a Rente of 15,000 francs per annum was entered in the Books of the Bank of France. One great grandchild, the Countess Rignon, survives.

1902. Mr. James William Groves bequeathed to the College by Will $\frac{3}{4}$ ths of his residuary estate, subject to the life-interests therein of his wife, Mrs. Florence Mary Jane Groves, and his sister, Miss Frederica Harriet Groves, for the general purposes and objects of the Museum (including in such purposes and objects the purchase of collections or the defraying of the expenses of the Conservator incurred in journeys abroad for the inspection of other Collections). It is expected that the sum ultimately placed at the disposal of the College under this Bequest will amount to about £30,000.

1910. Sir George Sutherland Maekenzie, K.C.M.G., C.B., left by Will a sum of £30,000, the income therefrom to be paid to his two brothers for their joint lives and the life of the survivor, and, on the death of the survivor, to be paid to the President and Council of the Royal College of Physicians and the President and Council of the Royal College of Surgeons for the purpose of providing the means of assisting qualified medical persons to pursue scientific medical investigation.

I. Annual Meeting of Fellows and Members.

THIS Meeting was held on Thursday, the 21st November, 1912, at 3 o'clock P.M.

The Chair was taken by the President, Sir Rickman J. Godlee, Bt. Twenty Fellows, of whom nine were members of the Council, and 82 Members attended the meeting.

The President placed before the meeting the Report of the Council for the period from the 1st of August 1911 to the 1st August 1912, copies of which had been circulated to 872 Fellows and 2729 Members, and made a statement regarding some of the matters which had come under the consideration of the Council during the year.

The President also referred to the death on August 26th of Mr. Clinton T. Dent, Vice-President, and stated that Mr. Edmund Owen had been elected a Vice-President for the remainder of the Collegiate year.

Resolutions of the Meeting.

I. The following Resolution was moved by Mr. H. Nelson Hardy and seconded by Mr. E. B. Turner :—

That this Meeting of Fellows and Members approves and endorses the action of the Council taken during the past year in reference to the National Insurance Act, and agreeing with the Council's statement in its letter to the Insurance Commissioners dated February 1st that the administration of medical benefits cannot be carried out under the Act, as it at present stands, with due regard to the interests of the public and the welfare of the medical profession, trusts that in the coming year nothing will deter the Council from discharging its duty to its Fellows and Members as firmly and as faithfully as it has done in the year that is past.

As an Amendment to this, it was moved by Dr. W. G. Dickinson and seconded by Mr. Sidney C. Lawrence :—

That this Meeting of Fellows and Members approves and endorses the action of the Council taken during the past year in reference to the National Insurance Act so far as it goes.

This Amendment was carried by 20 votes to 13, and was also put and carried as a substantive motion.

II. The following Resolution was moved by Sir Victor Horsley, seconded by Dr. J. Oldfield, and carried *nem. con.* :—

That this twenty-eighth Annual Meeting of Fellows and Members again affirms the desirability of admitting Members to direct representation on the Council which, as now constituted, only represents those Members who also hold the Fellowship; and that it does so in order that the constitution of the Council of the Royal College of Surgeons of England shall be in keeping with modern ideas of true representation.

III. The following Resolution was moved by Dr. W. G. Dickinson, seconded by Mr. Sidney C. Lawrence, and carried by 7 votes to 4 :—

That this Meeting regrets that the Council has not called a special general meeting of Fellows and Members to consider the National Insurance Act.

Comments of the Council.

Resolution No. I.—The Council are glad to find that their further action in connection with the National Insurance Act has met with the approval and endorsement of the Meeting of Fellows and Members.

Resolution No. II.—The views of the Council with regard to the question of the direct representation of Members were fully set out in their Annual Report of 1907, and the Council do not think that any further statement from them is needed.

II. National Insurance Act.

Further meetings of the joint Committee of the Royal Colleges of Physicians and Surgeons, the Society of Apothecaries, and the Medical Faculties of the Universities have been held, and at a meeting on November 13, 1912, the following Resolutions were passed:—

(1) That in the opinion of this Committee the conditions set up by the Provisional Regulations of the Insurance Commissioners, dated October 1st, 1912, are of such a nature as to interfere injuriously with the rights and proper independence of the Medical Profession, and with efficiency in the treatment of insured persons.

(2) That Medical Practitioners, in matters concerning their professional conduct, ought not to be tried before a tribunal that is not professional, the decisions of which may have the most serious effect on their reputation and practice.

(3) Seeing that the carrying out of the Provisional Regulations is left largely in the hands of the Local Insurance Committees, it would be unwise to agree to accept them (even if otherwise satisfactory), so long as the insured persons are represented upon these Committees by an overwhelming majority.

(4) That attention should be called to the advisability of establishing tuberculosis centres in connection with those Hospitals to which Medical Schools are attached.

Information regarding the working of the Act was collected from members of the profession practising in various parts of the country with the view of memorializing the Government in the event of an Amending Bill being introduced. Owing, however, to the late period of the Session at which this measure was laid before Parliament, it was thought that no useful purpose would be served by presenting such a memorial this year.

The following decision was given by the National Health Insurance Commissioners (England) in reference to the position under the Act of resident Medical Officers at Hospitals, a point upon which the President, on behalf of the Council, had addressed a letter to the Commissioners:—

“That Resident Medical Officers at Hospitals employed under the conditions referred to at the hearing on the 22nd October, 1912, are not employed under a contract of service within the meaning of the National Insurance Act, and are accordingly not required to be insured thereunder, even if their rate of remuneration does not exceed in value £160 a year.”

At the meeting of the Council in April, a letter, dated February 25th, 1913, was read from Dr. Percy C. Raiment, Hon. Secretary

of the London Medical Committee, asking to be informed regarding "the attitude of the Royal College of Surgeons towards such of its Fellows and Members as might become members of a Registered Trade Union formed to advance the interests of the Medical Profession and particularly as to whether the College would be likely to view their action adversely."

To this letter the following reply was sent by the Council:—

That, inasmuch as there is nothing in the Charters and Bye-Laws to prevent a Fellow or Member joining a Registered Trade Union, the formation of such a Union by members of the Medical Profession does not in itself appear to the Council to be a matter to which they can raise objections; and that the view which the Council might take of the conduct of any Fellows or Members in joining such a Union, or taking part in its affairs, would depend on the objects with which it is formed and the methods it adopts to attain such objects.

III. Primary Examination for the Fellowship.

In December 1912 suggestions for alterations in the Physiological part of the Primary Examination for the Fellowship were submitted to the Council in a Report from the Board of Examiners in Anatomy and Physiology for the Fellowship, and also in a Memorial from Teachers in Physiology.

These suggestions were referred for consideration to a large Committee of the Council, and in February 1913 the following recommendations of the Committee were approved and adopted by the Council:—

I. That clause 7 of Section III. of the Regulations relating to the Diploma of Fellow be altered from

"7. Of having attended a course of Practical Physiology during not less than six months at a recognised Medical School"

to the following:—

7. Of having attended at a recognised Medical School

(a) a course of Experimental Physiology

(b) a course of Chemical Physiology

(c) a course of Histology.

II. That this alteration in the Regulations be made applicable to all candidates who are not Members of the College entering for the Examination in May 1914 and for subsequent Examinations.

III. That two papers in Physiology, each containing four questions, of which the candidate must answer only two, be set, and that two hours be allotted to each paper.

IV. That the same arrangement be adopted for the written part of the Examination in Anatomy.

V. That these alterations with regard to the written papers be carried out at the next Examination in May of this year.

IV. Licence in Dental Surgery.

On the recommendation of the Board of Examiners in Dental Surgery the Council have adopted the suggestion of the Deans of the Dental Schools of London that candidates for the Licence should be required to pass the Preliminary Science Examinations before commencing any part of the course of study and practice required for the Second Professional Examination.

The alteration in the Regulations will apply to all candidates who commence professional study on or after the 1st of October, 1913.

V. Diploma in Tropical Medicine and Hygiene.

Representations having been made to the Committee of Management to the effect that the short title of the Diploma in Tropical Medicine and Hygiene, viz. "D.T.M. England," was not sufficiently descriptive, and that it was desirable to add a reference to Hygiene, the short title has now been altered to "D.T.M. & H. England."

VI. Egyptian School of Medicine.

Since 1906 a Visitor has been appointed annually by the Royal Colleges to attend the examinations of the Egyptian School of Medicine at Cairo held in December and January, and the examinations so attended have been recognised by the Conjoint Examining Board.

In view of the satisfactory reports of their Visitors, the Royal Colleges have now determined to extend their recognition to the examinations of the school at whatever period of the year they are held, and whether the Visitor of the Royal Colleges is present or not.

The arrangement with the Egyptian School of Medicine is that candidates who have received the Diploma in Medicine and Surgery of the Egyptian Government, after passing the required examinations and completing the curriculum of professional study at Cairo extending over four years, shall be admitted to the Final Examination of the Conjoint Examining Board in England on the completion of one year of additional study at a recognised Medical School and Hospital in the United Kingdom, during which they shall complete the courses required by the Regulations of the Conjoint Examining Board.

VII. The Scarcity of "Subjects."

During the past year the Council have had under consideration the difficulties which have arisen with regard to obtaining bodies for purposes of examination and dissection and for the teaching of operations.

Consultations have been held with the Licensed Teachers of Anatomy, and on December 11, 1912, the President attended at the Home Office with other members of a deputation from the Licensing Authorities and other Bodies with the object of calling the attention of the Secretary of State to the diminishing supply of "subjects," and urging the desirability of improving legislation in the matter.

VIII. Factory Lighting.

A letter has been received from the Joint Secretary to the Home Office Committee on Factory Lighting, stating that he has been asked to enquire whether the College can assist the work of the Committee by appointing witnesses who can give evidence as to damage to eyesight of persons working in factories due to defective conditions of illumination provided in such factories; and whether statistics are available from hospitals or from any Members of the College practising in industrial districts which would give information as to the prevalence of eye-trouble in any special trades.

Mr. F. Richardson Cross, F.R.C.S., President of the Ophthalmological Society of the United Kingdom, has been appointed to give evidence before the Committee.

IX. Title of "Doctor."

At a meeting on December 12, 1912, the Royal College of Physicians decided to alter Bye-law No. 179 of that College according to the following Resolution which was then adopted:—

"That the words 'assume the title of Doctor, or' be omitted from the Bye-law."

[NOTE.—The Bye-law formerly stood thus:

"No Fellow, Member, Extra Licentiate or Licentiate of the College shall *assume the title of Doctor, or* append to his name the title of Doctor of Medicine, or the letters M.D., or any other letters indicating that he is a Graduate of a University, unless he has obtained a degree entitling him "to do so."

The words which are here marked in italics have been omitted.]

X. The Jacksonian Prize.

The Jacksonian Prize for the year 1912 has been awarded to Mr. Francis Willoughby Goyder, M.B.Cantab., F.R.C.S.Eng., of Bradford, Yorks., for his essay on "The Embryology and Treatment of Cleft-Palate."

The subject for the year 1914 is "The Pathology, Diagnosis, and Treatment of Trigeminal Neuralgia."

XI. Triennial Prize.

The Triennial Prize and John Hunter Medal have been awarded to Dr. William Blair Bell, M.R.C.S., of Liverpool, for his essay on "The Anatomy and Physiology of the Pituitary Body, and the Relationship with Disease of its Abnormal and Morbid Conditions."

The subject for the period 1913-15 is "The Human and Comparative Anatomy and Physiology of the Cerebellum."

XII. Blane Medals.

The Sir Gilbert Blane Medals have been awarded to Fleet-Surgeon Richard Cleveland Munday, H.M.S. 'Hyacinth,' 1910, and Fleet-Surgeon Edward Sutton, H.M.S. 'Highflyer,' 1911, both Members of the College.

This Medal was founded by Sir Gilbert Blane, Bart., F.R.S., a distinguished physician, best known for the sanitary reforms which he effected in the Navy, and the success of the measures which he introduced for the prevention of scurvy.

Under a Deed of Trust, dated the 13th March, 1830, he transferred to the College the sum of £300 three per Cent. Consolidated Bank Annuities to provide for two Gold Medals to be conferred once in every two years on two Medical Officers of the Royal Navy "who in the time required shall have delivered to the proper office Journals evincing the most distinguished proofs of skill, diligence, humanity, and learning in the exercise of their professional duties." The Journals were to be submitted for adjudication to the President of the Royal College of Physicians of London, the President of the Royal College of Surgeons of England, and the Senior Medical Commissioner of the Royal Navy (Director-General of the Medical Department of the Royal Navy).

In pursuance of authority given to them under the Deed, the Presidents of the Royal Colleges and the Director-General of the Medical Department of the Navy, with the approval of the Lords of the Admiralty, have this year made certain alterations in the

Regulations for the award of the Medals, and it is now provided "that one Medal be awarded annually to the Medical Officer who obtains the highest aggregate marks at the examination for promotion to the rank of Staff Surgeon now held twice a year in connection with the courses at the Medical School of the Royal Naval College, Greenwich—the award to be subject to the approval of the Presidents of the Colleges of Physicians and Surgeons respectively, and the Director-General of the Medical Department of the Navy."

XIII. The Schiff Home of Recovery.

Under the scheme made by the Charity Commissioners for the regulation of this Charity it is provided that one member of the Managing Committee shall be appointed by the Royal College of Surgeons.

Mr. G. H. Makins, C.B., has been appointed in accordance with this provision as the representative Member of this College on the Committee for the period of five years.

The Home was founded and endowed by Sir Ernest Frederick Schiff "for the reception and accommodation of poor persons of either sex who are suffering from wounds, the result of accident or operation, which still require surgical supervision and nursing, and who have been under treatment for the accident or operation as In-Patients at one of the following London General Hospitals:—Charing Cross Hospital, Guy's Hospital, King's College Hospital, The London Hospital, Middlesex Hospital, St. Thomas's Hospital, and University College Hospital."

XIV. Portraits.

A replica of the portrait by the Hon. John Collier of the late Sir Henry T. Butlin, Bart., President of the College 1909–11, has been presented to the College by Lady Butlin. The picture has been hung in the entrance hall to the Museum.

Under the Will of the late Mr. Caesar Henry Hawkins the College has acquired a portrait by Zoffany of Mr. Pennell Hawkins, Master of the Company of Surgeons in 1778, and great-uncle of Mr. Caesar Henry Hawkins. In accordance with the testator's wish the portrait has been hung in the Council Room near the picture painted by Hogarth of Sir Cæsar Hawkins, Bart., brother of Mr. Pennell Hawkins.

XV. Centenarian Member.

The Council have had the pleasure of sending their congratulations to Surgeon-Major Henry Benjamin Hinton, of Adelaide, South Australia, on attaining the age of 100 years.

Surgeon-Major Hinton was born at Southsea on March 7, 1813, and became a Member of the College in the year 1835. He served in India through the Mahratta and Sikh Wars and during the Mutiny, and on retiring from the Army lived at Launceston, Tasmania, and subsequently at Melbourne, Victoria, before taking up his residence at Adelaide.

XVI. Removal of Members.

The name of Charles Ernest Turner, who obtained his Diploma in 1898, has been removed from the list of Members of the College under Clause 2, Section XVI. of the Bye-Laws, relating to the case of Members whose names have been removed from the Medical Register by order of the General Medical Council.

Mr. Turner was convicted at the Central Criminal Court on October 16, 1912, of feloniously using an instrument with intent to procure miscarriage, and was sentenced to six months' imprisonment with hard labour.

The name of Ralph Raby, who obtained his Diploma in 1903, has been removed from the list of Members of the College under Clause 1, Section XVI. of the Bye-Laws, in consequence of his having been judged by the Council to have been guilty of disgraceful conduct in a professional respect.

Mr. Raby carried on a practice in Sydney, N.S.W., in connection with which advertisements and pamphlets of an objectionable nature were published and circulated.

XVII. Restoration to List of Licentiates in Dental Surgery.

The name of Thomas Wafer Byrne, having been restored to the Dentists Register, has been restored to the List of Licentiates in Dental Surgery of the College in pursuance of the provisions of Clause 14 of the Dentists Act 1878.

XVIII. Central Midwives Board.

Mr. C. H. Golding-Bird, who has been re-appointed a Member of the Central Midwives Board under Section 3 of the Midwives Act, submits the following report of the proceedings of the Board:—

MR. PRESIDENT AND GENTLEMEN,

Beyond the routine work of the Board, there is little to chronicle for the year 1912. The hope that the 2nd Midwives Bill might soon become an Act of Parliament has not been realized, and so the desirable improvements embodied in it are still in abeyance.

I have to record the retirement, in the spring of the year, of Sir William Sinclair from the Board, of which he had been a member from its formation; and at its meeting in October the Board had the painful duty of passing a vote of condolence with Lady Sinclair on her husband's decease.

In his place the Lord President of the Council has been pleased to appoint Professor Henry Briggs, F.R.C.S., C.M.Edin., to be a member of the Board.

The fact that midwives trained also as nurses act, especially in rural districts, in this double capacity, gives rise from time to time to the question as to how far this added duty may, through danger from infection, interfere with their obstetric duties. This matter took a specific form in February, when the Inspector of Midwives for Norfolk enquired of the Board whether midwives, who are also village nurses, should be employed to follow up school cases in connection with Educational Inspection and treatment. To this the Board replied that in strict compliance with its rules as to disinfection would be found adequate safeguard for maternity cases attended by midwives under the conditions stated.

In October the Board received a letter from a midwife practising in Chesterfield enclosing and complaining of a circular issued by the Chesterfield division of the British Medical Association, materially affecting the practice of midwifery in that town.

According to this circular, the medical practitioners of Chesterfield had agreed, as from Aug. 1, 1912, only to attend a midwife's summon's for aid on the terms contained therein, and which are as follows:—

“1. Every expected confinement must be booked with a medical practitioner, and a fee of 5s., as a retaining fee only, paid for the booking and examination.

“2. Doctors will not attend emergency notes from midwives requiring medical help, unless the patient has previously retained a doctor in case his services are required.

“(1) If a doctor, who has been previously retained, is called in by a midwife, the minimum fee will be £1 1s., but the 5s. paid for retaining will be credited as part payment of the full fee. The usual fee of £2 2s. or upwards will be charged for complicated cases.

“(2) In carrying out the arrangement, when a patient comes to book her confinement you will send her to her usual doctor before agreeing to attend her. He will examine her and will then give her a card for ‘attendance if required,’ or if he finds that she has kidney disease, or anything abnormal, he will advise her accordingly.

“(3) At the time of the confinement you will attend in the usual way. If everything is normal you will finish the case as before. If abnormal, you will send your official form for medical help together with the patient’s yellow card to the doctor who has been retained and is therefore responsible for attending.

“(4) These provisions will ensure your being able to obtain a doctor’s help wherever necessary; and, as the safety of the mother and the preservation of infant life healthy and unimpaired are of prime importance, any midwife who disregards these conditions will be reported to the British Medical Association and the Midwives’ Union; and patients in such cases will be advised to obtain the services of other nurses.

“(5) Persons who are too poor to pay the fees above mentioned, should be instructed to obtain an order from the Relieving Officer at the Union Offices for the services of the District Medical Officer.”

It will be noticed that § 2 renders it impossible for a midwife to obtain medical aid in emergency unless the other demands laid down have been complied with by the patient; and the Rules of the Board on this matter may be rendered thereby ineffective.

The Board greatly regrets the publication of such a document to its midwives, and can but regard it as another evidence of the difficulties thrown in the way of its administration of the Act by certain members of the medical profession.

The Resolutions of the Board on the matter, and which also formed the basis of its reply to the Nurse’s letter, were:—

1. That where a midwife has obeyed the rules of the Board regulating the summoning of medical aid she has discharged her duty to the patient.

2. That the Board has no authority over medical practitioners.

3. That the correspondence be forwarded to the Privy Council.

The Statistics for the year ending Dec. 31st are as follows:—

Number of Board Meetings	18
„ Midwives on the Roll	35,210
„ Women who have passed the Examination	1813
„ Midwives who have retired voluntarily	45
„ Penal Cases heard	135
„ Struck off the Roll	91
„ Censured	20
„ Cautioned	9
„ Sentence postponed	6
„ Allowed to retire	4
„ No action taken	3
„ Adjourned	2
„ Institutions at which midwives may be trained	148
„ Recognised Teachers	126
„ Approved Midwives	149

In order to secure the highest training for its midwives, and at the same time to reduce the number of training centres in the London area, the Board approached various teaching bodies with the view of getting them to admit outside pupils to their lectures; and whilst some declined for various reasons, others are prepared to fall in with the Board's proposal if suitable arrangements can be made. These, to December 1912, are Clapham Maternity Hospital; East End Mothers' Home; General Lying-in Hospital; Kensington Union Infirmary; New Hospital for Women; and the Maternity Nursing Association, Myddleton Square, E.C.

Although the subject of the National Health Insurance Act belongs to the current year, yet I feel that mention of its relationship to the work of the Board must be included in this report; it would have but little interest a twelvemonth hence.

In December the National Health Insurance Commissioners proposed a conference with the Board upon the subject in particular of the disposal of the 30s. maternity grant. A private interview was held in January 1913, and the matter discussed; and whilst the Board did not see its way, in its corporate capacity, to give advice on the subject, its various members were left free to hand to the Commissioners, in writing, their individual views; and this was done.

The following is the Schedule drawn up by the Commissioners, and now in force, as to the fees of duly qualified Medical Practitioners summoned in pursuance of the rules made under the Midwives Act 1902; and dated 10 January, 1913:—

Schedule.

	£	s.	d.
A. "For attending the mother on a summons in an emergency at any time before, or within 12 hours after, the end of labour.....	15	0	
B. "For attending the mother on a summons in an emergency at any time subsequently	5	0	
C. "For attending the child on a summons in an emergency—			
If the practitioner attends between the hours of 8 P.M. and 8 A.M. in response to a summons received between those hours	5	0	
In any other case"	2	6	

The following provisional regulations in reference to the above have also been issued and are in force:—

4. "(1) The prescribed fee shall not be recoverable as part of the Maternity Benefit—
 - (a) in any case in which the practitioner is summoned after the expiration of 10 days from the confinement of the person to or in respect of whom the Maternity Benefit is payable; or
 - (b) in any case in which the practitioner fails to give to the Approved Society or Insurance Committee concerned, within 24 hours of the time when he attends the summons, notice of the fact that he has been summoned, which notice shall be in the form specified in the Second Schedule to these Regulations or some other form to the like effect; or
 - (c) in any case in which the Society or Committee concerned is satisfied that adequate provision has been made for securing payment to the practitioner (otherwise than by the person to or in respect of whom the benefit is payable) of a fee not less in amount than the prescribed fee; or
 - (d) in any case in which the practitioner is a person with whom the Approved Society concerned have entered into an agreement for the attendance by him during her confinement of the person to or in respect of whom the Maternity Benefit is payable; or
 - (e) in any case in which the attendance is in respect of a condition on account of which the person to or in respect of whom the Maternity Benefit is paid is entitled to Medical Benefit."
5. "The Approved Society or Insurance Committee shall not be liable to pay by way of a prescribed fee or prescribed fees in

respect of one confinement, whether to one or more practitioners, a sum exceeding 15s. in all, or for attendance under paragraphs B and C of the First Schedule to these Regulations a sum exceeding 10s. in all, and where two or more practitioners attend in succession in respect of the same confinement, the right of any practitioner attending on the second or any subsequent summons to recover the prescribed fee as part of the Maternity Benefit shall be subject to the right of any practitioner who attended on a summons earlier in date."

"*Note*—Where the practitioner is unable to attach the notice given by the midwife, he should state the nature of the emergency in respect of which he has been summoned."

Whether such fees for often highly skilled professional services are likely to induce Medical Practitioners the more readily than is now the case, to obey the official summons of a midwife, it is not the province of the Board to determine: time alone can show this; but certainly the arrangements now in working in no way have altered or modified the Board's opinion that the early passage of a new Midwives Bill is urgently required.

I have the honour to remain,

Yours very faithfully,

C. H. GOLDING-BIRD.

The Hunterian Oration was delivered by the President, Sir Rickman J. Godlee, Bart., on the 14th February, 1913, the anniversary of John Hunter's birth.

In his Oration the President gave an account of the development of the Museum since the days of John Hunter, and drew a comparison between the character and work of John Hunter and Lord Lister.

In accordance with the terms of the Deed of Trust for the endowment of the Oration, a dinner was given in the evening, at which a number of distinguished guests were present.

XXI. Finance.**INCOME.**

The gross income of the College for the past year amounts to £26,379, an increase of £539 on the gross Income of the previous year.

There is an increase of £489 in the Examination and Diploma Fees for the Membership, and of £398 in those for the Licence in

Dental Surgery, but in the case of the Fellowship there is a decrease of £297. This decrease is due to a fall of 19 in the number of candidates at the Final Examination.

The share of the fees allotted to this College for the Diploma in Public Health and of those for the Diploma in Tropical Medicine is respectively £41 more and £14 less than in the previous year.

Incidental Receipts and Receipts from House Property, including the amount obtained from hire of rooms at the Examination Hall, show little variation, and do not call for comment.

The receipts from investments are £69 less than in the previous year, this reduction being due to the loss of dividends on stock sold in the previous year to meet demands for payments on account of new Examination Hall.

EXPENDITURE.

The expenditure in respect of revenue for the past year amounts to £22,261, and is £1,508 less than in the previous year.

As regards the cost of the examinations, there is a decrease of £120 in the total amount disbursed for examiners' fees, and of £885 in the half of the expenses at the Examination Hall paid by this College.

The general working expenses of the College in Lincoln's Inn Fields are £45 more than in the previous year, and in neither year are distinguished by any unusual items of large amount.

In the case of the special expenses of the Museum there is a decrease of £438, mainly due to a reduction in the expenditure on furniture and fittings and on catalogues and reports, which was exceptionally large in the previous year.

The special expenses of the Library were £163 more than in the previous year. This increase is due to expenditure on furniture and fittings and to the resumption of the work of rebinding old volumes.

The extraordinary expenditure, although less than in the previous year, is still considerable, amounting to £1,250. The principal items are sums of £395 for an electric lift to replace the old hydraulic lift, which had been in use for many years and had ceased to be efficient, and of £301, half the sum paid by the two Colleges to the owners of St. John's House, Queen Square, for damage to that house caused by the settlement of the new Examination Hall adjoining it.

GENERAL REMARKS.

The balance of income over expenditure in respect of revenue amounts to £4,117, and is larger than the amount realized in any year since 1887-1888.

The chief factor in the production of this large balance is the

reduction in the expenses of the Conjoint Examining Board at the new Examination Hall in Queen Square. There has now been a full year's experience of the new arrangements, and the share of the expenses paid by this College has amounted to £2,635. As previously stated, this sum is £885 less than the amount paid by this College in 1911-1912, when the Conjoint Examining Board occupied premises in the old Examination Hall under a temporary arrangement with the Institution of Electrical Engineers, and it is less by £2,020 than the amount paid in 1908-1909, the last year in which the Conjoint Examining Board was in full possession of the old Examination Hall. It will thus be seen that if the expenses of the first year in the new building may be taken as a fair guide to future annual expenses, the change from the old to the new Examination Hall has effected a reduction of about £4,000 in the annual working expenses of the Conjoint Examining Board. Against this must be set a loss of about £2,000 per annum in the amount realized by letting rooms, leaving a net gain as regards working expenses of £2,000 per annum, or £1,000 per annum to each College, under the new arrangement.

While, however, the balance of income over expenditure has been large, it has not been large enough to cover the depreciation during the year of the securities held by the College, amounting as this does to £8,874. On the other hand, as the payments for the new Examination Hall are nearly completed, it should be possible to devote a large portion of the balance during the current year to investment, and at the present low price of securities those investments will bring in a larger return in annual income than if made under former conditions.

EXAMINATION HALL, QUEEN SQUARE.

A further sum of £2,216 has been paid during the year on account of the new building in Queen Square, and a sum of £500 is still due to the builders from this College.

Since the close of the financial year the balance of the Architect's commission amounting to £318 6s., has been paid.

With the exception of the outstanding sum of £500, the payments, the Committee believe, are now complete, and a statement of the total expenditure of this College in the matter is appended.

XXVI. President's Visit to America.

The President having been asked to give an Address at Chicago on November 13, 1913, at the first Annual Congregation of the American College of Surgeons has accepted the invitation in accordance with the expressed wish of the Council.

The President, who also hopes to avail himself of an invitation to visit Toronto, where a number of Fellows and Members of the College are resident, will be absent about six weeks from the third week in October.

S. FORREST COWELL,

1st August, 1913.

Secretary.

THE MUSEUM.

THE Hunterian Collection, which forms the basis, and still a large proportion, of the contents of the present Museum of the Royal College of Surgeons of England, was originally arranged in a building which its Founder, John Hunter, erected for it in 1784, behind his house in Leicester Square.

John Hunter died October 16th, 1793, aged 65. By his will he directed the Museum to be offered in the first instance to the British Government, on such terms as might be considered reasonable, and in case of refusal to be sold in one lot, either to some foreign state, or as his executors might think proper.

In the year 1799 Parliament voted the sum of £15,000 for the Museum, and an offer of it being made to the Corporation of Surgeons, it was accepted on the terms proposed by Government*.

In 1806 the sum of £15,000 was voted by Parliament in aid of the erection of an edifice for the display and arrangement of the Hunterian Collection; a second grant of £12,500 was subsequently voted, and upwards of £21,000 having been supplied from the funds of the College, the building was completed in Lincoln's-Inn-Fields, in which the Museum was opened for the inspection of visitors in the year 1813.

In consequence of the large number of additions, this building became too small for the adequate display and arrangement of its contents; and more space being at the same time required for the rapidly increasing Library, the greater portion of the present building was erected, wholly at the expense of the College, in 1835, at

* The following are the Terms and Conditions on which the Hunterian Collection, purchased by Parliament, was delivered to the late Corporation of Surgeons; which Corporation having become dissolved, the Members thereof were re-incorporated by Charter, dated the 22nd day of March, 1800, under the Title of The Royal College of Surgeons in London:—

1st. The Collection shall be open Four Hours in the Forenoon of two days every week for Inspection and Consultation of the Fellows of the College of Physicians, the Members of the Company of Surgeons and Persons properly introduced by them; a Catalogue of the Preparations, and a proper Person to explain it, being at those times always in the Room.

† 2nd. That one Course of Lectures, not less than twenty-four in number, on Comparative Anatomy and other subjects, illustrated by the preparations, shall be given every year by some Member of the Company.

3rd. That the Preparations shall be kept in a state of Preservation, and the Collection in as perfect a state as possible, at the Expense of the Corporation of Surgeons, subject to the annual Inspection and Superintendence of the Trustees.

4th. That there shall be a Board of Trustees, to consist of sixteen (increased to seventeen by the Lords of the Treasury in 1856) Members, by virtue of their Public Offices, and of fourteen others, to be appointed, in the first instance, by the Lords of the Treasury, and afterwards to be elected, as Vacancies may happen, by a Majority of the remaining Trustees.

5th. That the Museum shall always be open for the Inspection of all or any of the said Trustees, who are to take care that the Corporation of Surgeons perform their Engagements respecting the said Collection. That a day be appointed for the annual Inspection of the Museum, by the Trustees acting collectively as a Board; and that they are also to have quarterly Meetings, for the transacting of any Business relative to the Museum, and for the filling up of such Vacancies as may happen in the number of the Trustees; and that the Corporation of Surgeons shall engage some person to officiate as Secretary to the Board upon such occasions, and to issue previous Notice to the Members, in which he is to state particularly whether any Vacancies are to be filled up by new Elections.

† This Clause was altered by the Lords of the Treasury in 1894, to the following, viz.:—

2nd. That one Course of Lectures, not less than twelve in number, on Comparative Anatomy and other subjects, illustrated by preparations from the Hunterian Collection and the other contents of the Museum, shall be given every year by Fellows or Members of the College.

a cost of about £40,000, and the Hunterian and Collegiate Collections were rearranged in what are now termed Rooms Nos. III. and IV., which were opened for the inspection of visitors in 1836.

Further enlargement of the building having become necessary by the continued increase of the Collection, the College, in 1847, purchased the extensive premises of Mr. Alderman Copeland, in Portugal Street, for the sum of £16,000, and in 1852 proceeded to the erection of Room No. V., at the expense of £25,000, Parliament granting £15,000 in aid thereof. The rearrangement of the specimens was completed, and the additional portion of the building opened to visitors in 1855. The Collection still continuing to increase and more space having again become necessary, the College in 1888 determined to erect, at a cost of £19,000, two new Museums on the western side of the old structure. These buildings, called Rooms Nos. I. and II., were completed in 1891. Besides giving greater accommodation for the Collection in general they have also provided space for the display of photographs and drawings illustrating Diseases.

The Hunterian Collection was estimated to consist of 13,682 specimens, distributed under the following heads:—

Physiological Department, or Normal Structures.

Physiological preparations in spirit	3745
Osteological preparations	965
Dry do.	617
Zoological do.	1968
Fossils:—	
Vertebrate	1215
Invertebrate	2202
Plants	292

Pathological Department, or Abnormal Structures.

Preparations in spirit	1084
Dry preparations (including bones)	625
Caleuli and concretions	536
Monsters and Malformations	218
<i>Microscopic preparations</i>	215

Of the additions by which the size and value of the Collection have been so materially increased since it came into the possession of the College, very many have been presented by Fellows and Members of the College, and other persons interested in scientific pursuits. Among the largest contributions from this source have been the Collection, consisting of 847 specimens, presented in 1811 by Sir William Blizard; a valuable series of Pathological specimens presented in 1851 by Sir Stephen L. Hammick; and a Collection, presented in 1905 by Lt.-Colonel Sir Richard Havelock Charles, I.M.S., K.C.V.O., consisting of 248 skulls, and other specimens, representative of many of the Castes and Tribes of India. At the same time the Council of the College have availed themselves of various opportunities as they have occurred to purchase specimens of interest, especially at the dispersion of private anatomical and pathological museums, as that of Sir A. Lever in 1806, of Mr. Joshua Brookes in 1828, of Mr. Heaviside in 1829, Mr. Langstaff in 1835, Mr. South in the same year, Mr. Howship and Mr. Taunton in 1841, Mr. Liston in 1842, Mr. Walker in 1843, and, deserving of especial mention on account of the great number and value of the specimens acquired, those of Sir Astley Cooper in 1843 and Dr. Barnard Davis in 1880.

The Histological Collection, of which the 215 Hunterian specimens (prepared by Hewson) constitute the nucleus, was chiefly formed by the late Professor Quekett, with considerable additions by purchase from Dr. Tweedy J. Todd, Mr. Nasmyth, and Professor Lenhossek. It now contains upwards of 12,000 specimens, all arranged and catalogued so as to be readily available for reference.

In 1909 the Collection of the Odontological Section of the Royal Society of Medicine, consisting of about 5000 specimens, was transferred to the College under a Deed of Trust, and is now arranged with the other odontological specimens belonging to the College in a room specially prepared for its reception under Room II. of the Museum.

The superintendence of the Museum is confided by the Council of the College to a Committee of its Members, which Committee has held five meetings during the past year.

A summary of the progress made in the preservation, arrangement, and augmentation of the Collection will be found in the following Report.

CONSERVATOR'S REPORT.

General Progress.

IN each of the preceding annual Reports some alteration of considerable magnitude has been announced in connexion with the organization of the Museum. In 1910, the establishment of a special Odontological Room was reported; in 1911, the scheme adopted for the better exhibition of the Section of General Pathology was detailed; last year the reconstruction of new rooms for the collections of Surgical Instruments, Invertebrate preparations and Medico-Legal specimens was recorded. On this occasion there is no structural alteration or change in organization which specially calls for notice. The progress of the year relates to the routine work of the Museum—the preparation of new specimens, the investigation, description and cataloguing of specimens which have been presented or acquired during the past twelve months, and especially to the rearrangement and re-cataloguing of various sections of the Museum.

Pathological Collection.

It will be seen from the appended Report on the Pathological Series that important sections have been added to the collection of General Pathology. The section which illustrates Infective Processes and Diseases is particularly worthy of mention, and is certainly the most complete and effective representation ever made of the pathological manifestations which result from infections of the human and animal body. As Mr. Shattock and Mr. Beadles proceed with this work it becomes very apparent that the Council of the College was amply justified in undertaking the considerable expenditure involved in securing better facilities for the display of the Collection of General Pathology. Progress in this part of the Museum

must necessarily be slow; the desired specimen has to be found; its history has to be investigated, and its structure examined microscopically; it has to be dissected, mounted and described; catalogues have to be compiled for each stand. Each case, as it is finished, is ready for examination by visitors. Students are discovering the merits of the new series and are visiting this part of the Museum in increasing numbers.

*nations to the
theological
Section.*

A number of specimens have been added to the Pathological Series, some having been specially prepared in the workrooms of the Museum and others having been presented to the College. Of the latter there are several which deserve special mention. Sir Berkeley Moynihan presented a specimen which illustrates the results of complete excision of the stomach with union of the œsophagus to the upper part of the small intestine. The patient lived 3 years and 9 months after the operation. Mr. Mayo Robson presented a collection of gall-stones removed in the first series of operations he carried out for their removal. Through Mr. Hastings Gilford the Museum was enabled to acquire a skeleton which illustrates the condition described by him under the name of Progeria. Models prepared and presented by Dr. Wakelin Barratt, illustrating the processes of normal and abnormal division of the nucleus of the cell, have a direct bearing on the problems relating to cancer, and are welcome additions. A remarkable skull, which has been investigated and described by Dr. Douglas Derry, has been presented by Prof. Flinders Petrie. The skull is that of an ancient Egyptian, and represents a peculiar form of Hydrocephaly. Mr. Albert Carless presented several valuable specimens—one representing the pathology of Ectopia vesicæ, another, a congenital cyst from the raphe of the scrotum. Those in charge of the pathological departments of the Metropolitan hospitals and schools have been liberal in their support of the Museum. St. Thomas's Hospital, University College Hospital, the London Hospital, the Great Northern Central Hospital, West Ham and East London Hospital, the Seaman's (Dreadnought) Hospital, King's College Hospital, St. Bartholomew's Hospital, and the Middlesex Hospital have placed such specimens at the disposal of Mr. Shattock and of Mr. Beadles as were needed to complete the College series. For specimens which illustrate infectious conditions incident to the tropics, the College is indebted to Sir George Turner (Bilharzial lesions of the bladder), Capt. A. Whitmore, I.M.S. (specimens illustrating the lesions of a glanders-like disease), the Director of the British Museum (Natural History), Prof. F. M. Sandwith, and Dr. S. M. Livesey. Sir Frederic Eve, Sir John Bland-Sutton, Sir Henry Morris, Bart., Dr. H. A. Lediard, Mr. J. E. Adams, and Mr. J. D. Malcolm have, as in former years, presented valuable specimens.

*Gynæcological
Series.*

Although the Gynæcological series forms part of the Pathological Collection under the charge of Mr. Shattock, it has had the advantage of Mr. Alban Doran's services during recent years. In the Report of last year it was announced that Mr. Doran had completed the preparation of a new catalogue for the Gynæcological Series—numbering over 600 specimens—and written a Guide for visitors to this part of the

Museum. In the present year Mr. Doran has added several new preparations, including a series of pelvis which illustrate some of the conditions which cause difficult labour. He has also devoted himself to the preparation of a descriptive catalogue of the obstetrical instruments now in the Museum—a very extensive collection, a large part of which has been given to the College on loan by the Royal Society of Medicine. Amongst these Baudelocque's Cephalotribe finds a place, preserved in the original case given to it by Sir Charles Looock. Mr. Doran's work has entailed a very extensive and painstaking research of medical literature in order that the history of the instruments may be correctly given in the catalogue.

*Surgical
Anatomy and
Diseases of the
Ear.*

It would be impossible to write too highly of the care and energy Mr. Arthur Cheate has devoted to the Otolological section of the Museum during the past year. Two years ago Mr. Cheate presented his private collection illustrating the Surgical Anatomy, Abnormalities, and Diseases of the Ear to the College—his gift forming the basis of the collection as now arranged in the rail cases in the upper gallery of Room II. Last year the Council requested Mr. Cheate to arrange the collection and to prepare a catalogue for the use of students and visitors. The greater part of that task has now been completed. The collection is a very complete representation—not only of well-accepted facts in the Anatomy and Diseases of the Ear, but also new points illustrated by instructive specimens—the results of Mr. Cheate's personal investigation and observation. In the arrangement of the collection and in the preparation of the descriptive catalogue, Mr. Cheate has not included the Ear specimens belonging to the Toynbee Collection. The Toynbee Collection, formerly shown in the rail cases of Room III, has been removed to cases in the upper gallery of Room II, and is thus side by side with the more modern collection. The great historical value of the Toynbee Collection—the work of a pioneer in aural surgery—is thus left unimpaired, for the instruction of future generations.

*Odontological
Collection.*

In the Odontological section of the Museum many improvements have been carried out by the Honorary Curator, Mr. J. F. Colyer. The Hunterian specimens are better mounted and displayed than before; many new and beautiful preparations illustrating the anatomy of the teeth have been added, while the sections illustrating the irregularities, pathology and comparative pathology of the teeth have been extended, renumbered and recatalogued. The collection is much frequented by dental students and by those carrying out investigations in dental anatomy and pathology. A meeting of the Odontological Section of the Royal Society of Medicine was held at the College in order that its members might have an opportunity of seeing the various additions which have been made during the year, and the various improvements in arrangement and cataloguing carried out by Mr. Colyer. It is obviously much to the advantage of the collection that such meetings should be held occasionally in connexion with the Museum.

The letter issued last year, in the name of the President of the College, has been the means of bringing in many additional ophthalmological specimens. One of the largest gifts to this section of the Museum is that made by Mr. H. E. Juler, F.R.C.S., who presented a series of 150 specimens. Mr. Stephen Mayou is engaged at present in preparing a descriptive catalogue of the specimens, which are being mounted in a manner devised by him. They are being exhibited in the upper gallery of Room III,—a gallery which will be devoted to illustrating Injuries and Diseases of the Ear and Eye.

The arrangement of the Invertebrate Collection in the new room (Room VIII) at the east end of the Museum was carried out by the Physiological Curator, Mr. Burne. The collection is now excellently displayed. Several of the floor cabinets, in which the collection was formerly exhibited in Room III, were utilized, but it was also necessary to provide new cases and shelves at a cost of £110. A series of excellent dissections illustrating many obscure points in the anatomy and physiology of Vertebrates and Invertebrates have been prepared by Mr. Burne and the Prosector, William Pearson. The card catalogue has been applied to several additional sections of this department of the Museum under Mr. Burne's charge. Mr. Burne has also extended the system of labelling of cases and shelves to other sections of the Physiological Series, thus making the arrangement of the collection easier to understand and to study. He is also preparing a guide to the Physiological Collection, which in due course will be submitted for the consideration and approval of the Museum Committee. Research in this part of the Museum has been carried out by Professor F. Cole, Dr. Gordon, Dr. Chalmers Mitchell, Mr. R. I. Pocock, Mr. G. C. Robson, Dr. R. W. Shufeldt, Professor Toldt, Professor W. Wright, and many others. The Physiological Curator desires to acknowledge the effective assistance given him by Sydney Steward, attendant in the Physiological Department.

Attention may be drawn to some of the more important specimens added during the present year to the Physiological Series:—

Pedal glands of Antelopes obtained from the Zoological Society through the kindness of Mr. R. I. Pocock; shed gizzard linings of the Curlew, from Dr. Hammond Smith; the electric organ in the orbit of *Astroscoptes*—a rare fish, presented by Professor McClure; the œsophagus of a Pouter Pigeon, from Mr. Sneath; and some fine examples of the Giant Sea Pen (*Paniculina*), obtained from Professor W. A. Herdman. A considerable number of specimens (mostly Hunterian) have been remounted. This work, often requiring very delicate handling, has been done with great care by S. Steward. A particularly valuable gift to the Comparative Osteology Series are the three skeletons of adult Orangs presented by Dr. Charles Hose of Sarawak, who has done so much to forward our knowledge of the Fauna and Native peoples of Borneo.

*Teratological
Collection.*

This section of the Museum continues to enlarge, and at no distant date will require increased accommodation. A number of the specimens added during the present year illustrate a subject which Hunter investigated—the condition which may be described as “Free-Martinism,” or imperfect development of the sexual organs in twins of unlike sex. The occurrence of a similar condition among certain breeds of goats has been observed by Mr. C. J. Davies, who forwarded an example to the Museum for investigation. Miss E. Mortimer, who owns a celebrated herd of Anglo-Nubian goats, sent another example. Full microscopical investigations were made not only of the sexual organs but of the organs of internal secretion, and preparations were preserved for the Museum to illustrate the conditions which were found—counterparts of defects which may also occur in man. It is evident that under the condition—usually spoken of as pseudo-hermaphroditism—there is a variety of maldevelopments, all of which require further investigation. Such investigations are likely to throw light on certain obscure problems relating to sexual differentiation. For several valuable additions made to this section of the Museum the College is indebted to Miss Haydon, Matron of the Lying-in Hospital, York Road, Lambeth. Dr. C. Welch presented a specimen of Symelian monster, the lower limbs being completely fused; Dr. Stannus a peculiar form of double kidney; Dr. R. Lloyd a remarkable form of congenital ectopia of the abdominal viscera. The card-catalogue system has now been applied to the Teratological Series.

*Human
Osteology.*

During the past year the Conservator has devoted himself chiefly to investigations connected with the Osteology department of the Museum. It becomes apparent, as methods of archaeological and geological research become more accurate, that it will be possible to collect sufficient material to form a complete representation of the physique (so far as physique can be judged from skeletal remains) of the various peoples who have inhabited England in past times. The importance of ascertaining the physical condition of long past generations of Englishmen became very apparent some years ago, when enquiry was made as to whether the physique of modern Englishmen was, or was not, degenerating. No answer could be given, because no exact data exist which bear on the physical development of past generations. As already indicated, the necessary material, in the form of skeletal remains, does exist, and if systematically and carefully collected would, in time, yield the information required. During the present year several valuable additions have been made to the Museum of human remains belonging to well ascertained periods. Through Mr. Harold Peake, who investigated an Anglo-Saxon cemetery of late 6th century, or early 7th century date, the College was able to obtain the remains of twenty-six individuals. The physical character of the Anglo-Saxon people could thus be studied, the condition of their teeth and jaws ascertained, the degree of nasal obstruction and the development of the limb-bones noted. Captain H. F. Bidder presented a smaller collection from an Anglo-Saxon cemetery of the 7th century which he opened near Mitcham, Surrey. Remains of the Roman period

were obtained from Mr. Henry Willis, of Ewell, and through Mr. Gerald Marshall from a Roman interment at Huntcliffe, Yorkshire. An ancient burial, made towards the close of the Paleolithic period, was discovered near Halling, Kent, the remains being sent to the Museum for examination. Lord Iveagh presented two skeletons—those of a man and of a woman—from an ancient grave, but unfortunately no accompanying objects were found to give a clue as to their date. One of the most ancient skeletons yet discovered in England—that found under a stratum of weathered chalky boulder-clay near Ipswich in 1911—has been acquired for the Museum. Although doubt has been cast on the authenticity of this skeleton, the Conservator feels certain, from a study of its physical characters, that the provenance given by its discoverer, Mr. Reid Moir, is correct.

Additions have also been made to other sections of the collection of Human Osteology. The College is indebted to Professor Elliot Smith for a further valuable gift—the remains of Egyptians of the 2nd Dynasty—a dynasty which was formerly unrepresented in any museum in this country. Through Dr. C. G. Seligmann the College has been able to obtain for the Museum representations of two imperfectly known African tribes—the Hadendawas, who live in the neighbourhood of Suakin, and of the Denkas, one of the Nilotic Negro tribes. Mr. T. W. Partington presented four crania of a tribe of the Solomon Islands. Prof. von Luschan of Berlin sent in exchange casts of the face, hands and feet of a member of a tribe of Pygmies recently discovered in German New Guinea. The American Museum of Natural History presented a cast of the “Trenton femur”—the oldest human remains so far discovered in North America. Dr. Ralph O'Leary presented a skull from an ancient Turkish grave, near Kirk Kilisse. The Rev. H. Mason of New Zealand brought home two skulls found in a prehistoric deposit near Wanganui in the North Island. They are of interest because they are undoubtedly skulls of Moriori, the people who are supposed to have inhabited New Zealand before the Maories. Dr. L. Sambon presented two ancient Italian crania which are of particular interest to the student of history. One is from an Etruscan tomb, the other from an interment of the Roman period.

*Prehistoric
Trephining.*

Much has been written of late concerning the antiquity of the operation of trephining, but hitherto the Conservator has been unable to obtain examples of this operation in prehistoric burials in England. The operation is also performed by native tribes in various parts of the world. Dr. W. E. Redman of Pieton, New Zealand, has presented a remarkable series of trephined crania from the Bismarck Islands of the Pacific. The skulls are accompanied by the obsidian implements by which the operation is carried out, and the bandages and dressings applied after the operation. The collection was made by Dr. Crump, who transferred them to the donor.

*Medico-Legal
Collection.*

The materials are being collected for the foundation of this part of the Museum. At present only one case in the new room (Room VII) at the east end of the Museum is set aside for medico-legal specimens.
1913.

Some of the most instructive gifts to this department have been given by Dr. Graham Grant, who is keenly interested in this new departure. Dr. W. A. Brend has also given great assistance in obtaining medico-legal specimens.

*Collection of
Surgical
Instruments.*

As may be seen from the list of additions made during the past year, this collection continues to increase at a rapid pace. In the report of the previous year a large gift of surgical instruments and appliances from the Executors of the late Lord Lister was announced. In the present year a collection of instruments was presented by the Governors of the Westminster Hospital. Mr. Alban Doran has been requested by the Council of the College to prepare a new catalogue of the whole collection and to supervise its arrangement. He has already completed the catalogue of the obstetrical forceps.

*Visitors and
Students.*

There has been an increased number of visitors and students to the Museum, the total number for the present year being 13,188. Of these, 5903 came on Fridays and Saturdays, the times at which the Museum is open to Nurses and other Women. The various classes which visit the Museum by special arrangement on Saturday afternoon—ambulance classes, first-aid classes, classes from technical schools, London County Council classes, Police classes, Scientific, Literary, and Natural History Societies—make increased demands for admission. In the past year 2101 individuals came to the Museum as members of these classes and societies. There can be no doubt that the College performs a valuable public educational service in opening the Museum to such visitors on Saturday afternoon. The requests made for admission are in excess of what can be conveniently granted, and hence it is necessary to exercise a strict supervision on the number of classes admitted on Saturday afternoons. Each class has to be accompanied by a teacher or guide who is either a Member of the College or is qualified to serve as an instructor. The foreman in the Museum—Wm. Finerty—is in charge during the hours on which the Museum is open on Saturday afternoon.

*Publications
connected with
Museum specimens.*

It would be impossible, nor is it necessary, to give a full list of all the publications which refer to specimens in the Museum. To a large extent it is used by medical writers in the same manner as a reference library is employed. In the following list are included papers which deal directly with specimens in the Museum, or which represent investigations carried out in the work-rooms of the College:—

Six of these were given by the Conservator (Prof. Keith), six by the Pathological Curator (Mr. Shattock), and three by the Honorary Odontological Curator (Mr. Colyer). As will be seen from the subjoined list, all these demonstrations were given on specimens in the Museum and represented the results of special investigation carried out by the members of the Museum staff.

Donors of Material.

In order to obtain the exact kinds of specimens required for the Museum it is necessary that the curators should have a wide series from which to choose. Thus it happens that those whose donations are not accepted for exhibition have really rendered the Museum a service. During the past year the following have assisted the Museum in this respect :—Mr. H. J. Price, F.R.C.S., the Matron of the Lying-in-Hospital, York Road, the resident officers attached to Westminster Hospital, London Hospital, University College Hospital, St. Thomas's Hospital, General Lying-in-Hospital, Queen Charlotte's Hospital, Women and Children's Lying-in-Hospital, Charing Cross Hospital, Dr. C. Lockyer, Dr. Arthur Davies, Mr. P. I. Watkin, Dr. Richard

Eager, Dr. Hammond Smith, Dr. G. Wardlaw Milne, Dr. A. B. Calder, Dr. G. G. Macdonald, Dr. A. Evison, Mr. H. Rischbieth, F.R.C.S., Mr. Harrison Butler, Dr. Oscar Hildesheim, Mr. W. A. Tatchell, Mr. S. Smulian.

Museum Staff.

An account was given in the Report of last year of the various members composing the Museum Staff. A number of changes have occurred during the present year. On October 8th, 1912, Mr. John Marle died after a brief illness. He had been in the service of the College for 47 years, acting, for the greater part of that time, as articulator, and later also performing the duties of time-keeper. He learned his art from Mr. James Flower who assisted Sir William Flower, when Conservator of the Museum, to arrange the Osteological Series now shown in Room V. A few weeks later, Thomas Hagan, who had been employed in the Museum for 27 years, died. For the greater part of that time he served as stoker, later as attendant in the upper workroom. The Museum Committee assigned to Thomas Newman, attendant in the Odontological room, the chief duties of articulator, and arrangements were made to transfer the work of articulating from a room in the basement—occupied by Mr. John Marle—to one in the upper floor of the Museum workrooms. Geo. Edgar Birt, aged 19, was engaged to take Newman's place in the Museum. Another change was necessitated by the transference of the services of Miss Wells from the Museum to the College. From 1910 to 1913 Miss Wells had charge of the dusting of the specimens in the Physiological Department of the Museum. On her engagement as housekeeper in March of the present year, Ernest Smith, who had been employed as messenger in the Hall of the College since 1907, was engaged as an attendant in the Museum, with charge of Rooms IV and V.

The Conservator takes this opportunity of acknowledging the loyal support he has received from all connected with the Museum staff. It will be seen from the specimens shown at the annual exhibition, that the hand of Mr. William Pearson has lost nothing of its cunning after 57 years of service to the College. In carrying out researches on the cæcum and colon, on the structure of the internal ear, and on the anatomy of the heart and on prehistoric man, the Conservator has to acknowledge the valuable assistance given him by the assistant prosector (Mr. H. C. Wilson) and by the Museum foreman (Wm. Finerty).

The work of the Museum has been facilitated by the installation of an electric lift in place of the hydraulic lift formerly in use. The change was effected towards the close of 1912. Another change which directly affects the preservation of the Museum was instituted in March of the present year. The duties of inspecting the Museum and workrooms after closing were formerly carried out by the Hall Porter and Articulator—both resident on the College premises. Now that there is no one resident in the College premises, the duties of watchman during the times at which the Museum and College are closed, are carried out by three night-watchmen, who relieve each other at stated hours.

REPORT ON THE PATHOLOGICAL SERIES.

Since the last Report, the work of developing the Series of General Pathology has steadily proceeded, and has been carried out upon the same lines, and with the details described in the last Report.

Nine additional stands on the ground-floor of Room III have been completed, all the specimens having been redescribed and remounted, and in several cases microscopically examined.

The microscopic sections made during the course of recataloguing are all preserved in cabinets in the work-room.

The morbid conditions illustrated on the nine stands referred to comprise:—Infective Processes and Diseases; Cysts; Benign Neoplasms, Lipoma, Fibroma, Myxoma, and Chondroma.

The new and important Series of Infective Processes and Diseases which has been incorporated in General Pathology has occupied much time in its preparation and arrangement, and contains a large number of specimens illustrating diseases caused by micro-organisms and other parasites. It replaces the small group which, till recently, was placed at the end of the Pathological Collection. The new series is subdivided into five chief sub-series as follows:—

- (1) Diseases due to Bacteria: Cultures of Bacteria Pathogenic in Man, Suppuration and Pyæmia, Gonorrhœa, Glanders, "Glanders-like disease" of Rangoon, Plague, Acute Pneumonia, Acute Endocarditis including the secondary lesions after Acute Rheumatic Fever, Cerebro-spinal Meningitis, Anthrax, Tetanus, Diphtheria, Typhoid, Bacillary Dysentery, Tuberculosis including its special effects on the lung, on bone, the joints, and in lower animals, Leprosy, and Aerogenic infection.
- (2) Diseases due to Moulds: Actinomycosis (Streptotrichosis), Madura disease.
- (3) Diseases due to Protozoa: Syphilis, including its special effects on the long bones and bones of the skull, Parasyphilitic affections, and

- Congenital syphilis, Spirochaetosis (Tick Fever), Trypanosomiasis (Sleeping sickness and Nagana), Malaria, Yellow Fever, Leishmaniasis (Natal Sore), Amœbic Dysentery, Psorospermiosis.
- (4) Infective Diseases of which the cause is as yet unknown: Hydrophobia, Small-pox, Beri-beri.
- (5) Diseases due to higher forms of Animal Parasites: Filariasis, Bilharziasis, Trichiniasis, Cysticercal disease, Hydatid disease.

The whole of the Series of Special Pathology has been rearranged on the various galleries, the previous arrangement being modified and the specimens so distributed as to occupy the vacancies occasioned by the removal of so large a number of specimens to the Series of General Pathology on the ground-floor.

Portion of the vacant space has been occupied by the extensive collection of specimens presented by the Royal Commission on Tuberculosis. The flat preparations in gelatine, from the Commission, have been displayed in the rail cases opposite the other specimens.

A certain number of bones, previously catalogued in the Pathological Collection but kept loose in the cabinets, have been transferred to the rail cases.

Under a new arrangement, the Series of Diseases of the Eye, Ear and Teeth have ceased to form part of the General Collection, these specimens having been transferred to the new and greatly extended special collections devoted to these organs.

To the Dermatological Collection a valuable series of cultures of Ringworm fungi has been presented by Dr. T. Colcott Fox.

The additional specimens prepared during the year number 150, of which about a third are being included in the Series of General Pathology.

From among these may be mentioned a group of bladders illustrating Bilharzial disease, presented by Sir George Turner; specimens of a Glanders-like disease in Rangoon, by Capt. A. Whitmore; three preparations illustrating repair after operations, viz., Œsophago-jejunosomy (Sir Berkeley Moynihan), Uretero-jejunosomy (C. A. Ballance, Esq.), Prostactectomy (Sir Rickman J. Godlee).

Conservator.

THE LIBRARY.

THE Library of the College dates from the year 1800, in July of which year the first grant of a sum not exceeding £50 was made for Library purposes. It had been the intention of the old Corporation of Surgeons to form a Library, but they failed to carry their intention into effect. In its early years the Library was considerably increased by presentations and bequests of books—the principal donors being Dr. Baillie, Sir Everard Home, Sir Charles Blicke, the widow of Mr. Sharp, Sir Ludford Harvey, Dr. Fleming, Mr. Cotton, and Mr. Long. The Court of Assistants also directed from time to time the expenditure of small sums of money for the purchase of books. Sir Charles Blicke, in the year 1816, invested the sum of £300, the proceeds of which were to be devoted to the same object. By these means extensive purchases were from time to time made from the libraries of Mr. Pitt, Mr. St. André, Sir Anthony Carlisle, and others. The progress of the Library, however, for the first twenty-six years of its existence was very slow, but in 1827 great efforts were made to put it in a thoroughly good condition; in that and the two subsequent years the sum of £5269 was spent in the purchase of books, and in 1829 the first Librarian was appointed. The College was practically rebuilt by Sir Charles Barry in 1835-36, and during that period the Library was closed, the books being packed in cases and stored in the Museum Gallery. On the 15th of February, 1837, the Library was re-opened, the rooms in the new building allotted to this department being the Reading-Room and the Librarian's Room. From this date until 1888 very little extra accommodation had been provided for the Library, a small Committee-Room had been fitted up with shelves and room made for a few books under the Theatre.

The munificent gift of Sir Erasmus Wilson enabled the Council in 1888 very materially to increase the Library accommodation, and at the same time to improve and re-decorate the existing building. The residence of the Conservator of the Museum at the east end of the College was pulled down, and the building erected on its site was devoted to Library purposes. On a level with the old Reading-Room an extension was built, the two rooms being connected by four archways, two on the ground and two in the Gallery. Beneath this a handsome Book-Room was provided, and below that a spacious Store-Room. The new building, as at present shelved, gives accommodation for 26,000 volumes. The Librarian's Room was considerably improved by throwing into it a loft above the old ceiling and a passage which led into the Reading-Room.

The whole of the Library premises were re-decorated, and the Electric Light was installed throughout. The heating apparatus, which was under the floor at the south side of the Library, was all removed, and in its place a coil of hot-water pipes was placed in each window. The gallery railing, being in an unsafe condition, was replaced by one of a stronger pattern.

This extension of the Library made it possible to re-arrange the books in such a way as to make them more accessible to readers. In the Gallery of the Extension stand the books on Anatomy, Physiology, Pathology, Medicine and Surgery; round the Reading-Room are ranged sets of the Periodicals and Transactions in

greatest demand. There is also a good collection of dictionaries, encyclopædias, systems and general books of reference, conveniently arranged for the use of readers.

The lower room contains books on Chemistry and Physics, *Materia Medica* and Therapeutics, Forensic Medicine, Diseases of Women and Children, History of Medicine and Surgery, Biography and Bibliography. The basement is devoted to old sets of Journals and Transactions, a collection of Theses, and to miscellaneous books.

The Librarian's Room contains the books on Biology, and certain valuable works, including many Early Printed Books, which are kept in glass cases.

The current numbers of the Journals are displayed on tables down the middle of the Reading-Room: four of these are fitted with sliding trays, in which books too large for the wall-cases, and illustrated works still in progress, are kept. The new books are placed on a stand in the centre of the Room: these are catalogued directly they are received, and are at once available for readers. A list of the additions is posted in the Library.

The first Catalogue of the Library was issued in 1831. A classed Catalogue was prepared by Dr. Willis, and was in use in MS. for some years; in 1838 a synopsis of it was printed, and the work itself was published in 1843. In 1853 an index of subjects was issued, and four supplements to the Author Catalogue were published between the years 1840 and 1860. In 1890 a List of Transactions, Periodicals, and Memoirs in the Library was published. A new Catalogue of Authors and Subjects is now being prepared on cards; these are kept in cabinets at the west end of the Reading-Room, and are available for use by the readers. When the work is finished the cards can be used as copy for the printers.

The Library is particularly rich in the Transactions of Societies, and in Periodicals relating not only to Medicine and Surgery, but also to the accessory sciences. The large illustrated works on Zoology, Anatomy, &c., are also well represented. There is a good collection of Portraits of Members of the Medical Profession.

In December 1892 a Common Room for the use of Fellows and Members was opened in the Reading Room adjoining the Entrance Hall.

A new Store Room for books was fitted up in the basement in 1901, and in 1907 a new room with an annexe was added in proximity to the gallery of the large Library.

During the past year the supply of books and papers has been well kept up.

The Donations to the Library include a pencil sketch by the late Lord Lister of a catgut ligature, signed and dated June 30, 1869, and the "Hunterian Oration," 1913, from the President: Drewry Ottley's "Life of John Hunter," once the property of Sir Charles Hawkins, with a number of documents, pamphlets, etc., referring to the subject of the memoir, from the executors of the late Mr. Clinton Dent, through Sir James Sawyer; his work on "Fibroids of the Uterus" from Sir John Bland-Sutton; Lombroso's "Crime," Nordau's "Degeneration," Saleille's "Individualization of Punishment," Gross's "Criminal Psychology," De Quiros's "Modern Theories of Criminality," and Tarde's "Penal Philosophy" (translations) from Sir John Tweedy; his Bradshaw Lecture for 1912 from Mr. Mansell Moullin; "A Sketch of my Life" by Henry Power, privately printed and specially bound for the Library, from Mr. D'Arcy Power; "Medico-Chirurgical Society's Transactions," vol. xviii, 1833, Louis' "Mémoires ou Recherches Anat.-Path.," 1826; Abernethy's "Surgical Observations," Edit. 4, 1817, Travers's "Constitutional Irritation," Edit. 2, 1827, Prout's "Stomach and Renal Diseases," Edit. 4,

Bat., 1725, and three MS. volumes, viz.—"Lectures Anatomical and Chirurgical," by Dr. William Hunter, 4to, 1775 (books originally the property of Sir Joshua Brookes, but not positively proved to be written by William Hunter, whose handwriting, however, closely resembles one of those used in the volumes), from Dr. Squire Sprigge; his "Papers on Psycho-Analysis" from Dr. Ernest Jones; a fine copy of Cole's engraving of Surgeons' Hall from Dr. Fingland; his "Mannal of Veterinary Physiology," Edit. 4, from Major-General F. Smith; his Harveian Oration from Sir James Goodhart, Bart.; his complete collection of pamphlets and catalogues of the International Exhibition of Hygiene, Dresden, 1911, which together constitute a valuable history of Hygiene and Public Health, from Mr. Armit; his work on "Glycosuria" from Dr. Cammidge; his "Vicious Circles in Disease, Edit. 2, from Dr. J. B. Hurry; his pamphlets on sales of the eggs of the Great Auk, the Dodo, etc., from Mr. Thomas Parkin; his "Biologische Untersuchungen," Neue Folge xvii, from Dr. Gustaf Retzius; Edit. 3 of his "Lectures on Diseases of Children" from Dr. Hutchison; three rare theses on the Hypophysis and Pineal Gland from Dr. Leonard Kidd; eight reprints of papers from Prof. Adami; his "Study of Fracture of the Lower End of the Radius," 1897, and "Notes on the Modern Treatment of Fractures," 1899, from Dr. John B. Roberts; the only known portrait of Thomas Blizard, from an oil painting, from Dr. Clippingdale; their

work on "Diseases of Children," 1913, from Drs. Garrod, Batten, and Thursfield; an old broadside on Vaccination and four old medical pamphlets from Mr. E. F. Wesley; "Register of Members of the General Council of the University of Glasgow" (Jan. 1, 1813, and onwards) from the University Librarian; two MS. volumes of Lectures on Surgery, one course having probably been delivered by Astley Cooper in 1813, from Mr. Gerald S. Marshall; his "Protective Inoculation against Cholera," 1913, from Professor Haffkine; his "Reports to the Secretary of War," 1902-1912, from the Surgeon-General of the United States Army; "Medical Extracts," vols. i-v, 1799-1800, and "Medical Facts," vols. i-viii, 1791-1797, together with Denman's "Midwifery," 2 vols., 1794, from the Director of the London School of Tropical Medicine; and "The Surgeon's Log," 1913, from Mr. John Abraham.

During 1912-13 the Library has been open 275 days, and the number of Readers has been 8380, making an average of readers of 30 per diem. This decrease in the average is probably accounted for by the fact that Readers in the Library often do not sign their names in the book kept in the hall for the purpose of receiving their signatures. The Librarian takes this opportunity of reminding them that they should be careful to sign their names before entering the Library, as the average is made up from the record in the book. He would also like to appeal to the Readers and to Fellows and Members for donations, when possible, of their published works, which in the past it has been customary to present to the Library.

VICTOR G. PLARR,
Librarian.

4. The Prize shall be awarded by the Council on the recommendation of a Committee at the Quarterly Meeting of the Council in the April following the expiration of the quinquennial period. The Council shall not, however, award the Prize should they not consider any work deserving of it.

6. The grounds upon which the Prize is awarded shall be made public at the time of the award.

NOTE.—It is not intended that Essays should be submitted in competition for this Prize, or that those who are anxious to obtain it should be called upon to submit their names as Candidates. It is hoped, however, that the knowledge of the reward which may be obtained, and the distinction which it will confer on its recipient, will prove an incentive to those who are occupied in the study of this disease.

John Tomes Prize.

1. The John Tomes Prize shall be awarded triennially.

2. The Prize shall consist of the amount of the interest accruing from the John Tomes Fund during the triennial period (about £29). A document, declaratory of the award, sealed with the College Seal, and signed by the President, shall be presented with the Prize.

5. The Prize shall be awarded by the Council on the recommendation of a Committee at the Quarterly Meeting of the Council in the April following the expiration of the triennial period. The Council shall, however, withhold the Prize if, in the opinion of the Committee, no work within the prescribed time be of sufficient merit to justify its award, and in such case shall either invest the dividends to augment the capital of the Fund, or adjudge the Prize to the author of some original research, deserving recognition, in other than dental subjects which may have been carried out by any person eligible for the Prize.

6. The Committee shall consist of five members, and shall be appointed by the Council not less than one year prior to the date of the award of the Prize. The Committee shall not of necessity be confined to Members of the Council.

7. No essays shall be submitted in competition for the Prize in the case of the next award, which shall be for the period ending the 31st December, 1914; but it shall be open to the Committee to recommend to the Council that essays should be called for before any subsequent award.

Cartwright Prize.

1. The Cartwright Prize will be awarded quinquennially, and the next award will be for the five years ending 31st December, 1915.

2. The Prize consists of a Medal executed in bronze and an honorarium of £70.

(*A Diploma or Licence in Dental Surgery without a Medical or Surgical Diploma or Degree will not be a sufficient qualification.*)

5. The Prize will be awarded to the author of the best essay written in English upon the proposed subject, if such essay is considered of sufficient merit.

6. Every essay must have a motto or device and must be accompanied by a sealed paper containing the name and address of the author, and having on the outside a motto or device corresponding with the motto or device on the essay.

7. Each essay must be addressed to the Secretary of the Royal College of Surgeons of England, and delivered at the College not later than 4 o'clock p.m. on the 31st December, 1915.

8. The manuscript Prize essay and every accompanying drawing and preparation will become the property of the Royal College of Surgeons of England.

9. Every unapproved essay which is unclaimed at the expiration of twelve months from the date of its receipt will be returned, with any accompanying drawing and preparation, to the author thereof at the address given in the sealed envelope.

Begley Studentship.

1. The Begley Studentship shall consist of the dividends derived from the Begley Bequest, viz.: £20 per annum, and shall be tenable for three years, subject to the conditions hereinafter mentioned.

2. The Studentship shall be awarded in April 1915, and thereafter triennially, or at such time as any Studentship may become vacant.

3. The Studentship shall be open, on the occasion of the fourth award, to any Candidate admitted to the Second Examination of the Conjoint Examining Board in England held in April 1915.

4. The Studentship shall be awarded to the Candidate, if any, obtaining the highest number of marks in the Anatomical part of the Examination.

5. If two or more Candidates in the Anatomical part of the Examination shall obtain an equal number of marks, being with respect to the other Candidates the highest number of marks obtained by any Candidate, reference shall be made to the marks obtained by them respectively in the Physiological part of the Examination, and on the combined result the adjudication shall be made; and, if their marks shall still be equal, it shall be open to the two senior Examiners in Anatomy appointed by the Royal College of Surgeons to call upon such Candidates to present themselves for further examination, or to take such other steps as may enable them to adjudicate in the matter.

6. The Examiners shall report their adjudication of the Studentship to the Council at the Meeting of the Council next succeeding the Examination.

7. The Stipend shall be paid yearly, and the Student shall receive the first instalment within three months after the award of the Studentship.

8. The Student shall be required, before payment of the second and third instalments respectively, to send to the Secretary of the Royal College of Surgeons of England a Certificate from the Dean of his Medical School to the effect that his conduct has been satisfactory and that he has been applying himself diligently to his studies, and should any Student fail to comply with this requirement he shall forfeit his Studentship and all future payments in respect thereof.
